COUNCIL ACTION FORM

SUBJECT: 2023/24 STORM SEWER TELEVISIONING – VARIOUS LOCATIONS

BACKGROUND:

The televising of storm sewers is being done in anticipation of future capital improvement projects that are currently under design and scheduled for construction in 2024. The televising information will be used to identify any storm sewer repairs that may be needed in coordination with the improvements.

On May 8, 2023, staff initiated a Request for Quotes process in accordance with the City’s Purchasing Policies for the 2023/24 televising of storm sewers. The quote includes televising 34,345 linear feet of storm sewers ranging in size from 8” to 60”.

On June 2, 2023, one quote for the project was received as follows:

Televising of Storm Sewer	
Bidder	Total Bid
<i>Engineer’s Estimate</i>	\$ 42,931.25
Hydro – Klean, LLC	\$ 59,999.00

The engineer’s estimate was based on previous years’ bids. Staff is confident that Hydro-Klean, LLC will provide the best value for televising. Hydro-Klean, LLC, performed the last several storm sewer televising contracts with the City.

The budget for this work is shown below:

Funding Source	Available Revenue	Estimated Expenses
2023/24 Campustown Public Imp.	\$ 5,000	
2023/24 Seal Coat Pavement Imp.	20,000	
2023/24 Collector Street Pavement Imp.	7,000	
2023/24 Concrete Pavement Imp.	10,000	
2023/24 Asphalt Street Pavement Imp.	25,000	
Televising		\$ 59,999
TOTAL	\$ 67,000	\$ 59,999

ALTERNATIVES:

1. a. Accept the quote for the 2023/24 Televising of Storm Sewers.
 - b. Award the 2023/24 Televising of Storm Sewers to Hydro – Klean, LLC of Des Moines, Iowa in the amount of \$59,999.
2. Reject the quote and direct staff to pursue changes to the projects.

CITY MANAGER’S RECOMMENDED ACTION:

By awarding the contract for the televising of storm sewers, staff will receive adequate information to develop repair projects for damaged storm sewer pipes. Therefore, it is the recommendation of the City Manager that the City Council adopt Alternative No. 1, as noted above.
