Ames Flood Mitigation Study
Interview, Scope, and Fee Evaluation
18-Jun-12

		HDR	Stanley	Ayres
1	Strength of the team in performing hydrologic (flood crest height and timing) and hydraulic (inundation mapping) evaluations.	9.80	9.80	8.80
2	Approach of the team in leveraging the work of other entities (IDNR, Iowa Flood Center, etc.)	9.20	8.20	7.20
3	Track record of team in implementing a wide range of effective, innovative mitigation strategies.	8.00	9.40	8.80
4	Strength of the team in managing public meetings (engaging the public, eliciting input, involving citizens)	8.60	9.40	8.00
5	Approach of team in evaluating possible mitigation measures (design, cost estimating, environmental impacts, etc.)	8.60	8.60	8.60
6	Strength of team in incorporating rainfall sensitivity analysis into the recommendations.	9.80	7.60	8.60
7	Perceived ability of the team to work cooperatively and effectively with City staff and its partner agencies.	9.60	9.00	9.00
8	Overall appropriateness of proposed scope of work. (Is everything included? Any unusual exceptions? Are the tasks balanced?)	9.20	8.80	8.20
9	Fee Proposal	1.00	0.96	0.97
Overall Evaluated Score		9.09	9.01	8.54
