

COUNCIL ACTION FORM

**SUBJECT: 2014/15 SANITARY SEWER REHABILITATION
(MANHOLE REHABILITATION – FLOOD PRONE MANHOLES)**

BACKGROUND:

The ability of the sanitary sewer system to convey wastewater well into the future is dependent on the removal of the current large amount of infiltration and inflow (I&I, or I/I) in the system that occurs during wet weather. In order to minimize the need for costly expansions to the City's Water Pollution Control (WPC) facility, as well as to convey flows from new development as the City grows, the City must work to reduce the overall I/I in the system.

In March 2012 the City entered into a Sanitary Sewer System Evaluation agreement with Veenstra & Kimm, Inc. (V&K) from West Des Moines, Iowa. This included a comprehensive and systematic evaluation for identifying the defects that could contribute I/I across the entire, City-wide sanitary sewer system. This evaluation has been underway for several years. With the data collection phase complete, it is evident that there are over \$25 million worth of immediate structural improvements needed in the sanitary sewer system.

Current and future CIP projects for the sanitary sewer system are based on the results of this evaluation. Work includes rehabilitation such as the lining of existing mains or spray lining of existing structures, as well as complete removal and replacement of structures and sanitary sewer mains.

These projects were shown in the CIP beginning in 2014/15. Funding comes from the State Revolving Fund (SRF) in the amount of \$3,470,000 for each year with an annual increase of 5% for inflation. Repayment of the SRF loans will be from revenues generated in the Sanitary Sewer Fund.

A SRF Planning and Design Loan for \$375,000 was approved by City Council in March 2014. This loan was secured in order to hire a consultant to help determine the best action plan for implementation of system repairs, as well as for design services for the first two years of projects. At the September 23, 2014 meeting, City Council approved the engineering services agreement with V&K along with WHKS & Company of Mason City, Iowa to assist in the evaluation of the data.

The first project was bid and awarded by Council on July 22, 2015 to Save Our Sewers of Cedar Rapids, Iowa in the amount of \$1,662,502.06.

This is the second project to come out of the study, and was selected to have an immediate impact by removing Inflow & Infiltration (I&I) in manholes that are in areas prone to flooding. By eliminating I&I in these manholes, the existing sewer mains will regain some capacity. Items of work in the contract include replacement of existing manhole castings, installation of new external seals, and chemical grouting and cementitious lining of existing manholes. These rehabilitation methods will reduce the amount of clean water that enters the system, thus reducing the amount of water needing treatment at the plant.

On May 18, 2016 bids on the project were received as follows:

<i>Bidder</i>	<i>Amount</i>
Engineer's Estimate	\$ 980,000.00
Save Our Sewers	\$ 1,032,105.23
J&K Contracting	\$ 1,644,115.00

Three bids were received, but one was determined to be non-responsive.

Revenue and expenses associated with this program are estimated as follows:

	Available Revenue	Estimated Expenses
State Revolving Funds	\$ 3,270,000	
2014/15 Sanitary Sewer Rehab (Manhole Rehab – Previous project in Basins 1 & 5) (Under Contract)		\$ 1,622,502.06
2014/15 Sanitary Sewer Rehab (Manhole Rehab – Flood Prone Manholes) This project		\$ 1,032,105.23
Engineering/Administration (Est. for Both Projects)		\$ 390,000.00
	<u>\$ 3,270,000</u>	<u>\$ 3,044,607.29</u>

ALTERNATIVES:

1. a. Accept the report of bids for the 2014/15 Sanitary Sewer Rehabilitation (Flood Prone Manholes).
 - b. Approve the final plans and specifications for this project.
 - c. Award the 2014/15 Sanitary Sewer Rehabilitation (Flood Prone Manholes) to Save Our Sewers of Cedar Rapids, Iowa, in the amount of \$1,032,105.23.
2. Do not proceed with the project at this time.

MANAGER'S RECOMMENDED ACTION:

This project represents City Council's commitment to improve the sanitary sewer system. This is the second of several large projects that will have an immediate impact by removing Inflow & Infiltration to regain valuable capacity in the City's existing sanitary sewer mains.

Therefore, it is the recommendation of the City Manager that the City Council adopt Alternative No. 1 as described above.
