

Caring People ♦ Quality Programs ♦ Exceptional Service

MEMO

To: Mayor and Council Members
From: Brian Phillips, Assistant City Manager
Date: June 26, 2020
Subject: Metronet Service Areas

At the June 9 City Council meeting, the Council directed staff to inquire with Metronet regarding the areas it intends to provide service in Ames, and which areas it does not intend to provide service. Staff contacted Metronet and has received a map with the general areas Metronet expects to be able to have service availability at the conclusion of its initial buildout (anticipated in Fall 2020).

On the attached map:

- Blue areas are those where service will be available
- Yellow areas are private property where permission must be obtained from the owner to connect. It appears significant portions of these areas are government property or commercial developments.
- Red areas are those where density issues exist and Metronet does not plan to build.
