[External Email]

I am writing to reach out for information regarding a section on our parking lot that is used almost as a frontage road to access several other businesses. It hosts a fair amount of traffic through it and is falling into disrepair. We weren't sure if there was some sort of grant or financial assistance for roads like this as there is little incentive for us to keep it as a passthrough. We are trying to evaluate the damage and attempt some repairs but we are finding it is a rather large project and after this last year with little to no financial assistance we are straining to get the project moving. If there is someone in particular I could contact regarding this it would be greatly appreciated, I have attached a plan with the area in question outlined in red.

-Thank You,
