RE: Final Report to the Conference Board

From: Julie G. Roisen, MA, CAE, Division Administrator Local Government Services

Julie G. Roisen

On July 27, 2021, the Director of Revenue received a letter from the City of Ames Conference Board with three specific requests pertaining to the Ames City Assessor's office. This report documents the findings of the Division Administrator for the Local Government Services Division, Julie G. Roisen¹, in regard to the requested items. Excerpts of the Executive Summary provided via email to the Conference Board on September 1, 2021, are contained in this final report. The addendum contains all files, records and information that were reviewed as part of the request from the Conference Board.

From the Executive Summary:

Department staff visited the Ames City Assessor's office on Thursday, August 19, and Friday, August 20, 2021. This executive summary is prepared in response to the City of Ames Conference Board's July 27, 2021, request that the Department 1) review property records to determine disparate or missing information; 2) review Vanguard software implementation; and 3) review current staffing levels and overall office structure. On Tuesday, August 10th, Julie Roisen met with the assessor's staff and made written requests for information. The data requests were provided at various times on August 16, 17, 18, 19, 24, 30 & 31, 2021. The requests for information and staff responses are provide in the addendum of the final report. Not all items are discussed in the Executive Summary but are addressed in the final report.

Synopsis of Ames City Assessor's Office

The Ames City Assessor's office has five full-time employees, one part-time intern and a vacant residential appraisal position, a vacant city assessor position, and a vacant administrative assistant position. Staffing and organizational structure recommendations are made in section 3 of the document as part of the request from the Conference Board.

A data request for high level information pertaining to the office was made by Julie G. Roisen. Staff provided a response on August 19, 2021, and it is contained in the addendum².

There are approximately 21,095 improved taxable parcels in the assessing jurisdiction. This does, however, include the condo and cooperative parcels that have been discussed in the executive summary. Therefore, reducing this number by 7,660 parcels yields 13,636 improved parcels. There are also 799 vacant land parcels. This does not include the exempt parcels. The number of exempt parcels appears to

¹.Resume Julie G Roisen 09202021

² DataRequest_1

vary based on the information provided from 578 to the referenced 711 exempted parcels in other areas of the documentation.

There are several software systems the staff rely on. These include:

- Microsolve CAMA (computer aided mass appraisal)
- ProVal CAMA (Thomson Reuters)
- Microsoft Access Database
- Incode 10 tax administration (Tyler)
- EnerGov (city permitting system)
- Laserfiche (document imaging)
- Pictometry
- Data Cloud Solutions (mobile data collector)
- SPSS statistical package (used previously but not at present)
- Microsoft Excel

While onsite, staff revealed that during Richard Horn's tenure, Microsolve was the CAMA system used to value residential property valuations. Commercial property was valued on paper records. Microsolve used a methodology known as "feedback" which is similar to multiple regression analysis. Prior to Mr. Horn's retirement in 2005, the ProVal CAMA system was purchased to replace Microsolve, and a plan was put into place to retire Microsolve and transition to ProVal. Staff began to manually enter paper commercial records into ProVal. To date, the Microsolve CAMA system has not been retired, and staff are manually entering data into both the Microsolve system and the ProVal system. Commercial property records were being moved from paper card records and entered into ProVal beginning in 2005. Residential property information was either converted from Microsolve into ProVal or manually entered. Condo properties are still not fully in ProVal and are mostly managed in spreadsheets. A series of temporary staff were utilized as part of this plan, which resulted in some issues with data integrity from the temporary employees. The maintenance of two systems creates duplicative work for staff. Valuations for residential and non-residential properties are not completed in either system. All valuations are done through individual spreadsheets for each property.

There were delays in fully implementing valuations in ProVal. As a result, Microsolve continued to be used and the data was imported into SPSS statistical software from Microsolve to run a multiple regression sales analysis equation for residential property. This multiple regression equation was fully implemented in 2017³.

The multiple regression equation was put into Excel spreadsheets, which are still used today, to enter residential information on a parcel by parcel basis for development of the valuation. The model has been trended for time. The spreadsheets are used for each individual residential property that has new construction or a permit that cause a change in valuation. Because the regression model only arrives at a total value, the valuation of the land is allocated as 25% of the total value. There are no sketches, photographs, or notes contained in Microsolve. Sketches, photographs and notes are either in ProVal or attached through Laserfiche.

After Mr. Horn's retirement, the plan to transition from Microsolve to ProVal continued while Mr. Lynch used spreadsheets for all non-residential valuations, and Microsolve data was used for the residential multiple regression values. As a result, staff has been maintaining two CAMA systems in addition to all of the spreadsheets being used for all property types for valuations. No valuations are actually performed in either Microsolve or ProVal. All valuations are done in Excel spreadsheets. This practice causes an increase in staffing needs because the mass appraisal software (i.e. ProVal and Microsolve) are not

³ 2022 Residential MR Model SS

actually performing any valuations. This has caused duplicative work, extensive file transfers between systems, increased support staff requirements, and increased costs for maintenance of multiple systems. Conversion to a single CAMA system will ultimately reduce costs and reduce the need for several of the software systems and processes as well as alleviate the need for the extensive use of spreadsheets. Microsolve, ProVal, Access, Data Cloud Systems Mobile Assessor and SPSS will no longer be necessary. The Conference Board has signed a current contract with Vanguard Appraisals for their CAMA software, CAMAVision. Once conversion and implementation into this new system is completed, all of these other systems and processes will be unnecessary for the production of valuations and for the assessment administration process. Valuations developed in CAMAVision can be directly uploaded into Incode 10 (Tyler) tax administration software without intervention from an Access database. See examples of the spreadsheets for non-residential property in the addendum⁴:

Updates to the Beacon website for the present time come directly from ProVal for nonresidential property and from Microsolve for residential property. This maintenance of two systems, in my opinion, is unnecessary. Updates to the website can all be made from the ProVal system. Once the conversion and implementation are completed in CAMAVision, the new system can be used for updating the Beacon website.

Additional recommendations to combine the condominium and cooperative properties for the 2022 assessment were also made on August 25, 2021 to the operations manager, Deb Schildroth, and are included later in this document. The Executive Summary contained recommendations to immediately stop maintenance of one of the CAMA systems and convert from a single system into the newly contracted CAMA system. This alleviates duplication of work and effort on staff and reduces costs immediately for maintenance and updates.

Once implementation of the new CAMA system has been completed, there will be extensive analysis required to develop appropriate valuations. The new CAMA system functions based on a market driven cost approach as contrasted with the multiple regression equation for residential properties which was based on a sales model. Because the multiple regression model simply allocated 25% of the total value to the land, these land values may not be supported in a cost model. Therefore, abstraction and residual techniques will be necessary for the development of land valuation tables, as it is likely there will be insufficient residential land sales in all neighborhoods to rely completely on land sales for the development of land tables. In addition, analysis to develop the cost manual level and neighborhood analysis will be required as well as depreciation tables. All of this analysis relies upon sales and as such becomes the market, or sales comparison, driven component of the cost approach.

Request 1: Review of the Property Records to Determine Disparate or Missing Information.

Julie Roisen requested data from the assessor's staff in reference to the specific claims made. This request is documented in the addendum of this report⁵. Within data request 4, references are made to the following:

⁴ VALWKSHEET_0534447090_2501 Grand Ave B-Bops

VALWKSHEET_1006400010_3311 Lincoln Way

⁵ DataRequest_4_Final

- a. Commercial: No property record card, no commercial building record or no commercial building total areas, 682 records. Staff provided two standard reports from the ProVal CAMA for data integrity and commercial data integrity⁶.
These reports showed the same parcels repeatedly because of the way the standard report functions. Therefore, the actual number of parcels is significantly less than the report indicates. Examples of the missing information include use wall type LF not equal to floor B perimeter. The “missing” information did not appear to be relevant in the valuation process because the valuations are not performed within ProVal. ProVal is a repository of information only. All valuations are performed in individual spreadsheets or spreadsheet workbooks.
- b. Reference was made to boxes of commercial plans for new buildings in the assessor’s office. Staff verified that sketches were done in either ProVal or in the EnerGov permitting system. The few sketches that were not done in ProVal primarily consisted of garages. The information appeared to be contained in the valuation worksheets where necessary⁷.
- c. Residential condominiums are, as indicated by staff in Data Request 4, a mixed bag. There are 8,085 condominium parcels and 143 cooperative parcels. Some are in the Microsolve CAMA system, some are in ProVal and most are in Excel spreadsheets. All of these parcels are valued in Excel spreadsheets. Since the law change effective for the 2022 assessment, eliminating the multi-residential classification, these 7,660 condominium and cooperative parcels can be combined into 277 parcels and remain classed as residential. Recommendations have already been made to the City Assessor’s office that these parcels, representing individual apartment buildings and complexes, be combined for the 2022 assessment. This reduces the parcel counts by 36% and alleviates significant administrative burden. Of these parcels, approximately 6,000 are contained in Excel spreadsheets and are being valued via these spreadsheets. Documentation of this information is contained in the addendum⁸
- d. Questions pertaining to data integrity, according to staff, reflect the same parcels already referenced in the prior request and addressed in the records with missing data⁹.
- e. Missing sketch reports from ProVal are referenced both by the *SketchEditData* report as well as the various *CommSkt by neighborhood* reports. The neighborhood reports represent the various commercial neighborhood areas within the city as determined by the assessor and staff. The *SketchEditData* report is for residential sketches. Of the several hundred properties contained in these reports, almost all are exempt properties¹⁰.
The parcels, listed below, from these reports were taxable parcels that either did not have a sketch or did not have supporting valuation information. This information was obtained from

⁶ *DR4a_CommercialDataIntegrityReport and DR4a_CommercialDataIntegrityImproved*

staff and is included in the addendum. There are three emails in regard to these parcels. See notes within the emails for further information¹¹.

- 1) 09-16-425-090 has a taxable value, but no valuation documents in Laserfiche other than sales verification
 - 2) 09-22-100-030 has taxable value, and appears to have a minimum assessment agreement and valuation documentation as part of an informal appeal
 - 3) 09-22-150-015 has a blob instead of a sketch, has taxable value, and valuation worksheets
 - 4) 09-12-476-077 has taxable value, a cost letter, and rough sketch valuation documentation as part of BOR appeal
 - 5) 10-07-310-050 has taxable value; has valuation worksheet, and appears to be a partial value for 2021
 - 6) 09-08-225-015 has a valuation worksheet
 - 7) 09-09-226-140 has a valuation worksheet new construction for 2021 fraternity
 - 8) 09-17-110-000 has a cost letter
 - 9) 10-06-400-275 is taxable, and has no valuation worksheet
- f. References were made to parcels that contain no land value. A report contained in the addendum identifies all parcels that contain no land value¹².
In reviewing this list of parcels, there are a variety of reasons why there is no land value, including the following: buildings on leased land, condominium plats where the garages were platted separately, but valued with the other improvements, some exempted parcels, cell towers, signs, and other miscellaneous items. None appeared to be problematic.
- g. References were made to 711 exempt parcels. Of these parcels, it appears effective 08-31-21 306 records do not carry any valuation¹³.
- h. References were made to 16 pages of permits not contained in ProVal. This claim is false. The City Assessor's office has a batch process that uploads all permit information into ProVal. There were a very few limited permits that were not contained within ProVal at the time of this writing simply due to the fact the upload had yet to occur for that day¹⁴.

Excerpts from the Executive Summary RE: request # 1

As part of the overall data requests made to Ames City Assessor staff, there were specific requests in regard to records pertaining to disparate or missing information. Julie Roisen has verified with staff and reviewed the reports of the information that these claims referenced. The missing data referenced was based on a standard report from one of the computer aided mass appraisal systems (CAMA), ProVal, where the same parcels were listed multiple times and the "missing" information was not relevant or substantive in terms of the valuation. The reason this missing information is not relevant is because the valuations are not performed in this computer system. Valuations are done in multiple spreadsheets. See the addendum of the final report for the missing data report. Additional parcel record information is available for each of these parcels through laser

fiche. The referenced 731 parcels with no sketches are all exempt property except approximately six taxable parcels, which had no sketches in ProVal. Please reference the addendum of the final report. This is a standard report from ProVal. Of these six taxable parcels, it appears only two parcels do not have supporting valuation documentation. Sketches of these few parcels can be remedied easily through field inspections and/or through the EnerGov permitting system. Supporting documentation for the valuation can also be performed by staff. While it is important to have sketches and documentation on exempt property, it is not critical as long as there are valuations for the exempted property. Staff provided all of the documentation in regard to the sketches and verified these items while Julie Roisen was onsite. Based on a report provided by Lisa Henschel on August 30, 2021, it appears that of the 961 exempt parcels in Ames, 307 do not have value. Many, if not most, of these appear to be agricultural land and/or abandoned ROW. Completing these exempt records that have no value will need to be prioritized for the 2022 assessment based on the requirement in Iowa Code section 427.1(18). A listing is provided in the addendum of the final report of these parcels. Even though these exempt records didn't have valuation, there was no impact to the tax base, the City of Ames, and Story County taxpayers because the records are not taxable. The exempt records with no sketch could be prioritized for a date after the implementation of the new CAMA system.

The list of parcels with no land value are a variety of items that includes cell towers and condominium lots where the land and garages were platted separately, but are valued with the parcel containing the improvements. The complete listing of parcels is included in an addendum in the final report. There did not appear to be anything unusual or problematic with these parcel records. The reference to building permits not recorded in the CAMA system did not appear to be the case. Permit information for all parcels is contained in the ProVal system. The permit information does not show up on the Beacon website because the Microsolve CAMA system is used to update the Beacon website for residential property, and no permit information is contained in Microsolve. Building permits are scheduled on a batch process through EnerGov, the City permitting software, and uploaded into ProVal. Staff verified that the boxes of plans located in the assessor's office were either in ProVal and/or contained in the EnerGov system as a PDF. This information will be included in the addendum of the final report and cited as commercial plan index provided and verified by staff while Julie Roisen was onsite.

Request 2: Review of Vanguard Software Implementation

Julie G. Roisen requested specific information in regard to conversion and implementation plans into the Vanguard CAMAVision software application based on the request from the Conference Board. The staff provided limited information¹⁵.

There was no written conversion or implementation plan provided. Staff provided a copy of the data dictionary for ProVal, which is confidential information and was, therefore, not provided to the vendor as part of the conversion. Staff also provided some additional file information from Microsolve. Neither the ProVal nor Microsolve information is contained in this report, but could be obtained from the assessor's

¹⁵ *DataRequest_3 Final*

staff should the Conference Board wish to review this information. For the conversion, staff identified approximately 13,500 sketches that would need to be converted. Assuming the reduction in parcel count resulting from combining the condo parcels and the cooperative parcels, there are approximately 15,000 total parcels that need to be converted. A conversion high level document was provided to acting operations manager, Deb Schildroth on August 25, 2021. Information contained in the August 25th document is identified below¹⁶.

Date: August 25, 2021

To: Deb Shildroth

From: J.G. Roisen, Division Administrator

RE: High level conversion and implementation of Vanguard CAMAVision

Obtain cost breakdown and timing from Vanguard for the recommendations contained in the table below. In the discussion with Vanguard, ideally you would want to receive the final version of the converted records, sketches and lot sizing in the fall of 2022 or the winter of 2022. That way, if there is time to do analysis in the new CAMA system, there is a possibility that Vanguard CAMAVision could be used to produce valuations for 2023 assessment for residential. If not, the valuations can be trended based on sales ratio analysis for 2023 for all classes of property and the plan would be to use CAMAVision for the 2024 assessment. You will need to be in CAMAVision by 2024 to meet the state requirement for utilization of the 2020 Iowa Manual.

As noted previously in our discussions, having Vanguard staff sketch and link the diagrams to the pricing tables is the least risky option in a conversion from ProVal. Additionally, the manner in which ProVal contains the sketch data is based on a horizontal pricing method, while the Vanguard CAMAVision is based on a vertical pricing method. Therefore, the risk in a conversion of inaccuracies will be high because structurally the two systems are not compatible. Additionally, if sketches are converted, they may reflect a diagram but the actual "blob" is not able to be linked to the pricing tables. Having each diagram sketched in CAMAVision allows for the system to actually calculate the square footage, and then linking the sketch to the pricing tables assures that all aspects of the property characteristics are included in the calculated valuation. Converted diagrams may not actually calculate square footage, and I believe the converted sketches cannot be linked to the pricing tables. This would need to be confirmed with Vanguard technical staff.

There are no sketches, photographs, or permit information, and I believe notes or attachments contained in Microsolve. Therefore, conversion of Microsolve data may not yield any real benefit. You will want to confirm all data fields that are contained in Microsolve that are not contained in ProVal, and evaluate the benefit of the data and the cost to convert information which may or may not be beneficial in determining valuation.

¹⁶ *email Conversion sketching and lot sizing
High Level Conversion and Implementation of Vanguard CAMAVision*

There will also likely be data fields that do not “fit” into the CAMAVision system and will most likely have to be reconsidered as to where the best “fit” is in the new system.

Parcel Breakdown	Parcel Counts	Notes Sketches	Notes Land
Residential (excluding condos)	Improved 11,861 Unimproved 589	Contract with Vanguard to sketch and link all improved residential parcels	Contract with Vanguard to lot size using front methodology for all residential parcels using maps and information from Story County GIS
Condos	Improved 8,085 Unimproved 1	Wait on any sketches of condo properties until responses from taxpayers and as many as possible are combined into a single parcel for individual condo regimes	Land should be converted from square footage once the combinations are completed.
Cooperatives	Improved 143 Unimproved 2	Treat in the same manner as Condos: contact owners of cooperatives to begin to combine individual parcels into a single parcel for each cooperative regime.	Treat in the same manner as condos
Greek Housing	43	Contract with Vanguard to sketch and link	Convert land square footage from ProVal
MultiResidential	Improved 236 Unimproved 6	Contract with Vanguard to sketch and link	Convert land square footage from ProVal
Dual-Classed: need breakdown of improved versus unimproved	42	Contract with Vanguard to sketch and price improved parcels	Convert land square footage from ProVal

Parcel Breakdown	Parcel Counts		Notes Sketches	Notes Land
Commercial (non-condo)	Improved	847	Contract with Vanguard to sketch but the pricing will need to be done in conjunction with training and analysis	Convert the square footage from ProVal or acres if that is what is available
Commercial condos	Unimproved	223		
		77		
Industrial	Improved	31	Treat in the same manner as commercial	Convert the square footage from ProVal
	Unimproved	6		
Agricultural		166	Contract with Vanguard to sketch and link for ag dwellings	Convert the acres from ProVal
Ag Dwellings		8		
100% Exempted	Improved	375	There are limited to no sketches of exempt property so conversion of square footage if available	Convert square footage of land if available
	Unimproved	203		
Additional dwellings (2 nd dwelling on parcel)		C: 1 M: 2 R: 16	Contract with Vanguard to sketch and link all second dwelling on a separate sketch	Assume the land has already been resolved in other categories as this is a second dwelling

Subsequent to the Conversion High Level document from August 25, 2021, Julie Roisen reviewed Excel workbook files of examples of commercial property valuations. There are seven examples contained in the addendum¹⁷.

While these workbooks provide support for the valuations, they are not convertible in the format they are in today. These workbooks represent the extensive work and thought that was put into the valuation procedures for non-residential properties in the City of Ames by the City Assessor. From all appearances, all non-residential properties have individual workbooks that contain the information used to develop the valuations, except for the very few taxable parcels identified earlier in this document, and the exempt properties.

Installation of the software as soon as possible will assist in the staff beginning to become familiar with the system, and it will help staff understand the conversion needs as well.

Excerpts from the Executive Summary RE: Request # 2

It appears there was no actual plan for the conversion and implementation of Vanguard, even though a contract has been signed and there was, at minimum, a meeting with Vanguard staff and Ames City Assessor's staff. Of particular note and importance here is staff using two CAMA systems, Microsolve and ProVal. One system, Microsolve, appears to be slated for retirement. There are no sketches, photographs or, I believe, notes in Microsolve. Sketches, permits, photographs and notes, I believe, are either contained in or attached to ProVal through Laser fiche. However, valuations are not actually done in either system. Valuations are performed in multiple spreadsheets based on a multiple regression equation for residential property, and in multiple spreadsheet workbooks for all other property types except agricultural vacant land. The agricultural vacant land is done in Tyler's Incode 10, tax administration software. The Department would recommend that any conversion draw from one system, ProVal, because the vast majority of information needed for a conversion is contained in the ProVal system, while the Microsolve system has limited information. Staff should identify all data fields that are contained in Microsolve that do not exist in ProVal that they feel are relevant and manage these data fields until implementation of the new CAMA system. Trying to convert from two systems inherently increases risk and staff time unnecessarily during a conversion.

A recommendation was also made to city staff to contact owners of condominium and cooperative regimes, and request that multiple parcels be combined into single parcels for each apartment complex. Changes in Iowa Code from House File 418 for the 2022 assessment make this possible. This action would potentially reduce the workload on staff, the complexity of a conversion and implementation of the new CAMA system; as well as reduce administrative costs for the assessor's office and for the affected taxpayers. Approximately 39% of the improved parcel count is comprised of condominiums and cooperatives. Combining parcels where a single entity owns the entire regime will reduce the improved parcel counts by 7,660 parcels or approximately 36%.

To reduce risk and alleviate over burdening staff during the conversion, a recommendation that the Conference Board engage the vendor of the software application, to have the vendor re-sketch and link each sketch to the pricing tables for residential properties. There is a structural difference between the way the two CAMA systems price properties that, in all likelihood, is not compatible. Additionally, converting existing sketches will yield a diagram that does not calculate and cannot be linked to the pricing tables. A secondary recommendation is for the Conference Board to contract with the vendor to have all residential lots sized in the new CAMA system, as the data available for conversion within ProVal and Microsolve is not readily convertible into the new system. This, again, alleviates risk, staff time, and delay in the conversion and implementation process.

During the process, a plan will need to be made to allocate staff time to work with Vanguard to map the data into the new system, and a decision maker will need to be available to make determinations where data is not easily converted and/or mismatches exist in fit between ProVal and CAMAVision. Another recommendation would be to plan for complete conversion, if possible, by the 2023 assessment which would mean the work is completed in late 2022 or early 2023. Additional analysis will need to be done to value land and improvements within the new CAMA software at the time of go live. If the 2023 assessment is not feasible, then 2024 would be the last date for completion to be in compliance with the 2020 Iowa Manual based on the approved extension request.

Request 3: Review Current Staffing Levels and Overall Office Structure

To evaluate the staffing levels and overall office structure, Julie Roisen requested detailed data about the work volume, parcels counts, permits for new construction, Declaration of Value (DOV) processing, applications processing, Board of Review (BOR) petitions and questions pertaining to software systems. Staff provided answers found in the addendum¹⁸.

The current office structure and staff is comprised of the following positions:

City Assessor	Vacant
Former Deputy Assessor	Brenda Swaim
2 Residential Appraisers	1 vacant; Chris Bilslend
Database Manager (Technical Support)	Lisa Henschel
2 Appraisal Technicians	Dan Boberg; Judy Heimerman
Administrative Assistant	Vacant
Intern (Assistant Clerk)	Teresa Espinosa

The Executive Summary and this document address the reasons for the current staffing to be so heavily weighted toward support staff rather than appraisal staff. Alleviating the duplicative work being done in two CAMA systems potentially removes the need to replace the vacant administrative assistant position. As indicated in the Executive Summary, two FTE’s capable of appraising non-residential properties, which includes the assessor and a deputy, and two FTE’s for residential appraisals, as well as the two FTE’s as support staff (Appraisal Technicians) in addition to the Database Manager position, which will be particularly important during and after the conversion, would appear to be sufficient staffing, in my opinion, based on the facts available to me.

The following table highlights a summary of the workload by work type:

Residential parcel count (vacant and improved)	12,450
Condo & Cooperative parcel count (vacant and improved)	8,231
Non-residential excluding Condos & Cooperatives parcel count (vacant and improved)	2,263
Reduction in parcel count recommended based on combining Condos and Cooperatives	-7,660
Declaration of Values (Sales)	+/- 1,900 per year
Splits and Combinations of parcels	+/- 500 per year

¹⁸ DataRequest_2_Final

Permits Residential	+/- 400-500 per year
Permits Non-Residential	+/- 200 per year
Applications processing: homestead, military, DAV, other	+/- 500 per year
Board of Review (odd year)	2021 = 2,388 but this number reflects 2,202 condo parcels 2019 = 1,015 which also reflects 932 condo parcels
PAAB/District Court cases ¹⁹	40 cases primarily condominium properties
Existing permits for the 2022 Assessment as of this writing	637

The staffing recommendations remain unchanged between the Executive Summary provided on September 1st, 2021 and the conclusion of this final report.

Excerpt from the Executive Summary RE: Request # 3

The current staffing levels appear to be heavily weighted toward non-appraisal staff. The need for these support staff FTEs could be reduced by decreasing the duplicative work of keeping two computer-aided mass appraisal systems updated with information. An immediate improvement would be to stop using one of the existing CAMA systems to alleviate the burdensome nature of this maintenance on existing staff. Since the vast majority of information is contained within ProVal and the Microsolve system has much less information contained in it; retention of the system that contains the most relevant information makes the most logical sense. From discussions with the staff, no actual valuations, no permit information, or sketches, or photographs are being maintained or valued in Microsolve, so maintaining this system appears unnecessary. There are 5,417 condominium properties that are in Microsolve. However, combining the records that can be combined, as recommended earlier in this executive summary, reduces these parcel counts so the actual number left in Microsolve will be significantly less and can be managed either in spreadsheets or in ProVal until the implementation of the new CAMA system.

At the current time, it appears staff update the Beacon website with sale information for residential property from Microsolve. However, all sale information is maintained in ProVal, and the updates for nonresidential property to Beacon are done from ProVal. Beacon updates for all parcels could be done from ProVal. Again, indicating there is no need to continue maintaining Microsolve. Staff would need to work with the Beacon Schneider staff to get the batch processes in place to accomplish this for residential properties.

The current residential improved parcel count of 11,861 with the addition of second dwellings on parcels and agricultural dwellings the count equals 11,888. Assuming approximately 6,000 residential parcels per FTE, results in an estimate of approximately two residential appraisal FTEs would be required. All other nonresidential improved parcels, assuming a reduction in the residential condominiums which are actually

¹⁹ DR2g PAAB District Court

apartment buildings of 7,660 records, equals 1,844 total improved nonresidential parcels. Assuming approximately 1,500 parcels per FTE for a commercial appraiser equals approximately 1.25 FTEs. Considering the district court and PAAB caseload, another .5 FTEs may be necessary. This information indicates approximately 1.50-1.75 FTEs for appraisers with skill to manage commercial and other more complex properties. The assumption is the assessor or a deputy should be skilled enough to manage these property types, which leaves approximately .50-.25 FTE for office administration. Eliminating the maintenance of two CAMA systems reduces the administrative needs as well. Two FTEs should be sufficient as support staff, once the decision is made to stop using two CAMA systems. Because the City assessor's office is a separate assessing jurisdiction from the county, there is a higher need for technical support staff to manage between the city and county systems. Also, the upcoming conversion and implementation of a new CAMA system indicates a higher need for technical support staff. An additional benefit, once the implementation is completed, is that the technical support staff will be in a very good position to manage the new software and all interfaces, batch processing, and the ratio studies and reports needed for appraisal and administrative support staff.

Summary of the Department's Recommendation

Non-residential appraisal FTEs (assessor and possible deputy)	1.50-1.75
Residential appraisal FTEs	2
Support staff	2
Technical staff	1
Overall office management by assessor	<u>.25-.50 FTE</u>
Total FTE's estimate	7

Appraisers should be capable of handling the appeals at the Board of Review and be capable of making recommendations to the assessor and to the boards of review. These recommendations would be for valuation changes at an individual property level, as well as mass appraisal recommendations, to maintain values that are compliant with Iowa law.

The recommendations presented here, of course, need to be considered in the context of the skills and abilities of current staff and potential applicants for vacant positions. Efficiencies could be gained if the staff was expected to do both residential and commercial appraisal work. Additionally, having more than one staff person capable of doing both types of work improves the delegation of the work when vacancies occur. Cross training for the support staff would also improve the management of tasks when positions become vacant as well.

Another recommendation for the Conference Board to consider during the interim period, and until an assessor is hired, would be to contract with a vendor or appraiser to complete the non-residential permits for 2021, and for the partial permits remaining from 2020, unless current staff is capable of this type of work. If current staff is trained and capable of this type of work, then existing staff should be assigned to these duties. Additional recommendations for the outstanding PAAB and District Court cases would be to hire a designated MAI, or other licensed general appraiser, to provide limited scope analysis of the cases that are similar, such as the condominiums, to determine if settlement of the cases is possible or if a complete appraisal report is necessary for trial. The Conference Board may wish to consult with the City Attorney in regard to these decisions during the interim time period²⁰.

The conclusions and recommendations contained in the Final Report and Executive Summary were based on information provided to Julie G. Roisen by the Ames City Assessor's office staff. Every attempt has been made by Ms. Roisen to question staff and find the facts in regard to the claims of missing information and or data and report those facts to the Conference Board. Any new information could alter the conclusions set forth in the reports.

ADDENDUM

Julie G. Roisen, MA, CAE
2012 Wilby Circle
Albert Lea, MN 56007

507-402-2424
jgroisen@yahoo.com

Experience:

Sept. 2011 –Present

Local Government Services, Division Administrator Iowa Department of Revenue

- Manage, direct, and enforce equalization and appeal processes for 107 assessing jurisdictions. Calculation of the agricultural productivity model.
- Develop five year modernization plan including processing of Declaration of Value documents, approximately 120,000 annually, resulting in staff reduction of 4 FTE, gaining current processing with daily mail for the first time in over 40 years.
- Oversight of all centrally assessed properties; railroads, pipelines and appeals.
- Manage the education, examination and register of all assessors in Iowa.
- Responsible for 1.5 billion dollars in payments to local governments for all property tax credits and exemptions, local option sales and use tax and all other permitted tax types.
- Expert witness in regard to various legal issues involving property tax laws in Iowa and Minnesota.
- Implemented 2013 Property Tax Reform which included the Business Property Tax Credit, Replacement Claim and new classification. Trained and educated all stakeholders in the state on the legislative reform.
- Led, developed, tested, and implemented the creation of “LocalGovExchange” web portal for the exchange of data files from local government for processing and calculation of credit and replacement claim monies. Enabled local government to retrieve a data file(s) for importing into tax administration software for the production of statements.
- Provided leadership for other Department projects as required for modernization efforts.

2002 – 2011:

Deputy Director Taxpayer Services/County Assessor. Blue Earth County, Mankato, MN

- Plan, oversee and direct taxpayer services functions including; assessing, mapping, tax calculation & collection, tax distribution, recording, forfeiture, tax increment financing, tax court petitions.
- Provide vision for department to enhance public service and cost effective solutions for work performance. Supervise, hire, discipline, performance evaluations for staff.
- Directly planned, implemented, and trained staff, on three new major software implementations for CAMA mass appraisal, GIS mapping, GRM property tax administration software.
- Developed a strategic five-year plan for revaluation of all properties within Blue Earth County as the result of a Department of Revenue investigation for malpractices. Executed this plan successfully.
- Recipient of the Project Manager of the Year Award from Manatron Inc. the vendor for GRM property tax solution.

1988-2001:

Commercial Appraiser/Consultant Integrity Appraisals (owner).

Owned and operated a fee appraisal business. Employed by various agencies in commercial appraisal assignments of all types including: abatements, tax court petitions, expert witness. Clients included: Washington County, Stillwater, MN; Steele & LeSueur Counties MN, City of Bloomington, MN; Freeborn County, Albert Lea, MN;

Education:

- 2005 Mini Masters in Appraisal Certificate Program
University of St. Thomas, Management Center
Minneapolis, MN

- 1999 Mini MBA for Government Managers
University of St. Thomas, Management Center
Minneapolis, MN

- 1987 Master of Arts Economics
Mankato, MN

- 1986 Bachelor of Science Business Economics, Cum Laude
Mankato State University
Mankato, MN

Appraisal Related Education:

- Commercial Modeling Concepts
- Utah State University # 100 Unit Valuation
- PACE Minnesota Department of Revenue
- Standards of Practice and Professional Ethics

July 27, 2021

Director Kraig Paulsen
Iowa Department of Revenue
1305 E. Walnut Street
Fourth Floor 0107
Des Moines, IA 50319

Dear Director Paulsen,

Our recently hired City Assessor, Brenda Nelson, has resigned from the job for personal reasons. Therefore, prior to the Conference Board taking any hiring action we request the follow assistance from the Department of Revenue:

- 1.) Review of property records to determine disparate or missing information
- 2.) Review of Vanguard software implementation
- 3.) Review current staffing levels and overall office structure

This request is made under the Director's authority set forth under Iowa Code Section 421.17 including but not limited to subsections 1, 2, and 4.

Thank you for your time in considering this request.

Sincerely,

A handwritten signature in black ink that reads 'John A. Haila'. The signature is fluid and cursive, with the first name 'John' being the most prominent.

John A. Haila, Mayor
Chairperson
Ames City Conference Board
Ames, Iowa

1. Commercial	-no prc / ext or no comm bld record or no commercial bldg. total area	682
2. Residential	condos (a whole different animal)	?
3. Data Integrity		848
4. Sketches		731
5. Parcel with no land values which aren't exempt		126
6. 711 Exempts of those 316 have no value. The remainder have sketches that are blobs		395
		2782 Total

Linn County	6 appraisers	50,000 parcels
Pott County	5 appraisers/2 deputies	54,000 parcels

We will be hiring 2 people: An Appraisal Technician 52,600-75,900 Appraisal Support Specialist 46,850-68,300

We currently have budgeted 416,432 for employees other than the Assessor/Deputy. After filling the 2 open positions, the remaining salary line item is 27,605. Sketching and listing 2 properties per day would take 5.79 years. This does not include new construction from December - current.

RE: Action plan

From: J. G. Roisen, MA, CAE, Division Administrator Local Government Services

Executive Summary

The Department of Revenue, at the request of the City of Ames Conference Board, has been asked to review the status of the following identified items within the Ames City Assessor's office. The plan includes data gathering of requested items to be provided by city assessor staff, a physical review of the systems and data used by the assessing staff as well as a review of the conversion data and plans with city staff and Vanguard staff. The purpose and function of the review is to provide clarity for the Conference Board and for the recruitment and hiring process for the assessor's position. Department staff will be onsite in the Ames offices on Thursday August 19th and Friday August 20th. The Department shall provide a written report to the Ames Conference Board as soon as possible following the onsite review. Delays in receiving the data requests will impact the timing of the final report to the conference board.

Action Steps for Management

1. Submit a request for an extension for implementation for the 2020 Iowa Manual to January 1st 2024. The request should be to the Director and sent to me via email at julie.roisen@iowa.gov
2. Be prepared to submit an appeal of any tentative equalization order, excluding agricultural. The orders will be mailed to the assessor and the auditor by August 13th. There is a 10 day appeal window. Submit in writing email form to carmen.putzier@iowa.gov and ask for an oral hearing.

Review Plan

1. Data summary and high level information gathering
 - a. Management and processes
 - b. System integrations
 - c. Website
 - d. GIS
 - e. Taxable parcel counts
 - f. 100% Exempt parcel counts
 - g. Software system summaries
2. Data detail and staff responsibility
 - a. Detailed parcel counts and aggregate valuations and applicable system
 - b. DOV processing

- c. Splits and combination processing
 - d. Permits/inspections
 - e. Application processing
 - f. Boards of Review
 - g. PAAB and district court appeals
 - h. Inspection cycle
 - i. Software systems administration
 - j. Valuation methodologies and software systems used
3. Review of Vanguard implementation
- a. Conversion plan
 - b. Data dictionary
 - c. Historical information plan
 - d. Land
 - e. Sketches
4. Property records and disparate or missing information
- a. Commercial records 682
 - b. Residential condo's
 - c. Data integrity 848 records
 - d. Sketches 731 records
 - e. Parcels with no land value 126 and not exempt
 - f. Exempt parcels 711
 - g. Reference to 16 pages of parcels with building permits not entered into CAMA

RE: Report to Conference Board resulting from request under Iowa Code 421.17

From: J. G. Roisen, MA, CAE, Division Administrator Local Government Services

Executive Summary

Department staff visited the Ames City Assessor's office on Thursday August 19, and Friday August 20, 2021. This executive summary is prepared in response to the City of Ames Conference Board's July 27, 2021 request that the Department 1) review property records to determine disparate or missing information; 2) review Vanguard software implementation; and 3) review current staffing levels and overall office structure. On Tuesday August 10th Julie Roisen met with the assessor's staff and made written requests for information. The data requests were provided at various times on August 16, 17, 18, 19, & 24, 30 & 31, 2021. The requests for information and staff responses are provide in the addendum of the final report. Not all items are discussed in the Executive Summary but are addressed in the final report.

1) Review of Property Records to Determine Disparate or Missing Information:

As part of the overall data requests made to Ames City Assessor staff there were specific requests in regard to records pertaining to disparate or missing information. Julie Roisen has verified with staff and reviewed the reports of the information that these claims referenced. The missing data referenced was based on a standard report from one of the computer aided mass appraisal systems (CAMA), ProVal, where the same parcels were listed multiple times and the "missing" information was not relevant or substantive in terms of the valuation. The reason this missing information is not relevant is because the valuations are not performed in this computer system. Valuations are done in multiple spreadsheets. See the addendum of the final report for the missing data report. Additional parcel record information is available for each of these parcels through laser fiche. The referenced 731 parcels with no sketches are all exempted property except approximately six taxable parcels, which had no sketches in ProVal. Please reference the addendum of the final report. This is a standard report from ProVal. Of these six taxable parcels, it appears only two parcels do not have supporting valuation documentation. Sketches of these few parcels can be remedied easily through field inspections and or through the EnerGov permitting system. Supporting documentation for the valuation can also be performed by staff. While it is important to have sketches and documentation on exempt property, it is not critical as long as there are valuations for the exempted property. Staff provided all of the documentation in regard to the sketches and verified these items while Julie Roisen was onsite. Based on a report provided by Lisa Henschel on August 30, 2021, it appears that of the 961 exempt parcels in Ames, 307 do not have value. Many if not most of these appear to be agricultural land and/or abandoned ROW. Completing these exempt records that have no value will need to be prioritized for the 2022 assessment based on the requirement in Iowa Code section 427.1(18). A listing is provided in the addendum of the final report of these parcels. Even though these exempt

records didn't have valuation there was not impact to the tax base and the City of Ames and Story County taxpayers because the records are not taxable. The exempt records with no sketch could be prioritized for a date after the implementation of the new CAMA system.

The list of parcels with no land value are a variety of items that includes cell towers and condominium lots where the land and garages were platted separately but are valued with the parcel containing the improvements. The complete listing of parcels is included in an addendum in the final report. There did not appear to be anything unusual or problematic with these parcel records. The reference to building permits not recorded in the CAMA system did not appear to be the case. Permit information for all parcels is contained in the ProVal system. The permit information does not show up on the Beacon website because the Microsolve CAMA system is used to update the Beacon website for residential property and no permit information is contained in Microsolve. Building permits are scheduled on a batch process through EnerGov, the City permitting software, and uploaded into ProVal. Staff verified that the boxes of plans located in the assessor's office were either in ProVal and/or contained in the EnerGov system as a PDF. This information will be included in the addendum of the final report and cited as commercial plan index provided and verified by staff while Julie Roisen was onsite.

2) Review of Vanguard Software Implementation

It appears there was no actual plan for the conversion and implementation of Vanguard even though a contract has been signed and there was, at minimum, a meeting with Vanguard staff and Ames City Assessor's staff. Of particular note and importance here is staff using two CAMA systems, Microsolve and ProVal. One system, Microsolve, appears to be slated for retirement. There are no sketches, photographs or, I believe, notes in Microsolve. Sketches, permits, photographs and notes, I believe, are either contained in or attached to ProVal through Laser fiche. However, valuations are not actually done in either system. Valuations are performed in multiple spreadsheets based on a multiple regression equation for residential property and in multiple spreadsheet workbooks for all other property types except agricultural vacant land. The agricultural vacant land is done in Tyler's Incode 10, tax administration software. The Department would recommend that any conversion draw from one system, ProVal, because the vast majority of information needed for a conversion is contained in the ProVal system while the Microsolve system has limited information. Staff should identify all data fields that are contained in Microsolve that do not exist in ProVal that they feel are relevant and manage these data fields until implementation of the new CAMA system. Trying to convert from two systems inherently increases risk and staff time unnecessarily during a conversion.

A recommendation was also made to city staff to contact owners of condominium and cooperative regimes and request that multiple parcels be combined into single parcels for each apartment complex. Changes in Iowa Code from House File 418 for the 2022 assessment make this possible. This action would potentially reduce the workload on staff, the complexity of a conversion and implementation of the new CAMA system; as well as, reduce administrative costs for the assessor's office and for the affected taxpayers. Approximately 39% of the improved parcel count is comprised of condominiums and cooperatives. Combining parcels where a single entity owns the entire regime will reduce the improved parcel counts by 7,660 parcels or approximately 36%.

To reduce risk and alleviate over burdening staff during the conversion, a recommendation that the Conference Board engage the vendor, of the software application, to have the vendor re-sketch and link each sketch to the pricing tables for residential properties. There is a structural difference between the way the two CAMA systems price properties that in all likelihood is not compatible. Additionally

converting existing sketches will yield a diagram that does not calculate and cannot be linked to the pricing tables. A secondary recommendation is for the Conference Board to contract with the vendor have all residential lots sized in the new CAMA system as the data available for conversion within ProVal and Microsolve is not readily convertible into the new system. This again alleviates risk, staff time, and delay in the conversion and implementation process.

During the process a plan will need to be made to allocate staff time to work with Vanguard to map the data into the new system and a decision maker will need to be available to make determinations where data is not easily converted and/or mismatches exist in fit between ProVal and CAMAVision. Another recommendation would be to plan for complete conversion, if possible, by the 2023 assessment which would mean the work is completed in late 2022 or early 2023. Additional analysis will need to be done to value land and improvements within the new CAMA software at the time of go live. If the 2023 assessment is not feasible then 2024 would be the last date for completion to be in compliance with the 2020 Iowa Manual based on the approved extension request.

3) Review Current Staffing Levels and Overall Office Structure

The current staffing levels appear to be heavily weighted toward non-appraisal staff. The need for these support staff FTEs could be reduced by decreasing the duplicative work of keeping two computer-aided mass appraisal systems updated with information. An immediate improvement would be to stop using one of the existing CAMA systems to alleviate the burdensome nature of this maintenance on existing staff. Since the vast majority of information is contained within ProVal and the Microsolve system has much less information contained in it; retention of the system that contains the most relevant information makes the most logical sense. From discussions with the staff, no actual valuations, no permit information or sketches or photographs are being maintained or valued in Microsolve so maintaining this system appears unnecessary. There are 5,417 condominium properties that are in Microsolve. However, combining the records that can be combined, as recommended earlier in this executive summary, reduces these parcel counts so the actual number left in Microsolve will be significantly less and can be managed either in spreadsheets or in ProVal until the implementation of the new CAMA system.

At the current time it appears staff update the Beacon website with sale information for residential property from Microsolve. However, all sale information is maintained in ProVal and the updates for nonresidential property to Beacon are done from ProVal. Beacon updates for all parcels could be done from ProVal. Again, indicating there is no need to continue maintaining Microsolve. Staff would need to work with the Beacon Schneider staff to get the batch processes in place to accomplish this for residential properties.

The current residential improved parcel count of 11,861 with the addition of second dwellings on parcels and agricultural dwellings the count equals 11,888. Assuming approximately 6,000 residential parcels per FTE, results in an estimate of approximately two residential appraisal FTEs would be required. All other nonresidential improved parcels, assuming a reduction in the residential condominiums which are actually apartment buildings of 7,660 records, equals 1,844 total improved nonresidential parcels. Assuming approximately 1,500 parcels per FTE for a commercial appraiser equals approximately 1.25 FTEs. Considering the district court and PAAB caseload another .5 FTE may be necessary. This information indicates approximately 1.50-1.75 FTEs for appraisers with skill to manage commercial and other more complex properties. The assumption is the assessor or a deputy should be skilled enough to manage these properties types which leaves approximately .50-.25 FTE for office administration. Eliminating the maintenance of two CAMA systems reduces the administrative needs as well. Two FTEs should be

sufficient as support staff once the decision is made to stop using two CAMA systems. Because the City assessor’s office is a separate assessing jurisdiction from the county, there is a higher need for technical support staff to manage between the city and county systems. Also, the upcoming conversion and implementation of a new CAMA system, indicates a higher need for technical support staff. An additional benefit, once the implementation is completed, is that the technical support staff will be in a very good position to manage the new software and all interfaces, batch processing, and the ratio studies and reports needed for appraisal and administrative support staff.

To summarize the Department’s Recommendation:

Non-residential appraisal FTEs (assessor and possible deputy)	1.50-1.75
Residential appraisal FTEs	2
Support staff	2
Technical staff	1
Overall office management by assessor	<u>.25-.50 FTE</u>
Total FTE’s estimate	7

Appraisers should be capable of handling the appeals at the boards of review and be capable of making recommendations to the assessor and to the boards of review. These recommendations would be for valuation changes at an individual property level as well as mass appraisal recommendations to maintain values that are compliant with Iowa law.

The recommendations presented here of course need to be considered in the context of the skills and abilities of current staff and potential applicants for vacant positions. Efficiencies could be gained if the staff was expected to do both residential and commercial appraisal work. Additionally having more than one staff person capable of doing both types of work improves the delegation of the work when vacancies occur. Cross training for the support staff would also improve the management of tasks when positions become vacant as well.

Deb,
Please see attached.

I would suggest that Lisa focus on working with Vanguard to review the data dictionary she was provided to map the conversion of your parcels. Dan's participation would also be beneficial since he works directly with ProVal and should be able to work with Lisa on the conversion. The attached recommendation should provide Vanguard with enough information to give you a cost estimate for sketching everything, lot sizing the residential using a front foot methodology and linking the residential dwellings to the pricing tables. The timing of getting on their schedule I believe is crucial as well. Maps for the lot sizing should be available from Story County. You will need to find out how Vanguard wants the information to be provided to them.

The condo's and cooperatives can be dealt with once you have as many of them combined into individual regimes as possible.

I also believe that converting from ProVal is the better option. Asking Vanguard to convert from both ProVal and Microsolve, in my opinion, inherently increases the risks and the costs unnecessarily. I assume you have already tasked staff with determining what data fields are contained in Microsolve that are not contained in ProVal. Additionally there will be some things that cannot be converted and will have to be managed manually after the conversion is completed. Lisa should have a good handle on this as you move through the process. I have already recommended to Lisa that she identify as many different types of residential and other properties as exists, such as a wood frame rambler, a wood frame two story, a brick story and a quarter etc. This then becomes the pool of parcels that are used to check the converted data. Staff will not be able to check every single parcel so having a subset of unique records that are checked each time the converted data is returned to you is critical to reducing errors and risk.

Thank you,
Jewels

RE: High level conversion and implementation of Vanguard CAMAVision

Obtain cost breakdown and timing from Vanguard for the recommendations contained in the table below. In the discussion with Vanguard ideally you would want to receive the final version of the converted records, sketches and lot sizing in the fall of 2022 or the winter of 2022. That way if there is time to do analysis in the new CAMA system there is a possibility that Vanguard CAMAVision could be used to produce valuations for 2023 assessment for residential. If not, the valuations can be trended based on sales ratio analysis for 2023 for all classes of property and the plan would be to use CAMAVision for the 2024 assessment. You will need to be in CAMAVision by 2024 to meet the state requirement for utilization of the 2020 Iowa Manual.

As noted previously in our discussions, having Vanguard staff sketch and link the diagrams to the pricing tables is the least risky option in a conversion from ProVal. Additionally the manner in which ProVal contains the sketch data is based on a horizontal pricing method while the Vanguard CAMAVision is based on a vertical pricing method. Therefore, the risk in a conversion of inaccuracies will be high because structurally the two systems are not compatible. Additionally, if sketches are converted they may reflect a diagram but the actual "blob" is not able to be linked to the pricing tables. Having each diagram sketched in CAMAVision allows for the system to actually calculate the square footage and then linking the sketch to the pricing tables assures that all aspects of the property characteristics are included in the calculated valuation. Converted diagrams may not actually calculate square footage and I believe the converted sketches cannot be linked to the pricing tables. This would need to be confirmed with Vanguard technical staff.

There are no sketches, photographs, or permit information and I believe notes or attachments contained in Microsolve. Therefore conversion of Microsolve data may not yield any real benefit. You will want to confirm all data fields that are contained in Microsolve that are not contained in ProVal and evaluate the benefit of the data and the cost to convert information which may or may not be beneficial in determining valuation. There will also likely be data fields that do not "fit" into the CAMAVision system and will most likely have to be reconsidered as to where the best "fit" is in the new system.

Parcel Breakdown	Parcel Counts		Notes Sketches	Notes Land
Residential (excluding condos)	Improved	11,861	Contract with Vanguard to sketch and link all improved residential parcels	Contract with Vanguard to lot size using front methodology for all residential parcels using maps and information from Story County GIS
	Unimproved	589		
Condos	Improved	8,085	Wait on any sketches of condo properties until responses from taxpayers and as many as possible are combined into a single parcel for individual condo regimes	Land should be converted from square footage once the combinations are completed.
	Unimproved	1		
Cooperatives	Improved	143	Treat in the same manner as Condos: contact owners of cooperatives to begin to combine individual parcels into a single parcel for each cooperative regime.	Treat in the same manner as condos
	Unimproved	2		
Greek Housing		43	Contract with Vanguard to sketch and link	Convert land square footage from ProVal
MultiResidential	Improved	236	Contract with Vanguard to sketch and link	Convert land square footage from ProVal
	Unimproved	6		
Dual-Classed: need breakdown of improved versus unimproved		42	Contract with Vanguard to sketch and price improved parcels	Convert land square footage from ProVal

Parcel Breakdown	Parcel Counts		Notes Sketches	Notes Land
Commercial (non-condo) Commercial condos	Improved	847	Contract with Vanguard to sketch but the pricing will need to be done in conjunction with training and analysis	Convert the square footage from ProVal or acres if that is what is available
	Unimproved	223		
		77		
Industrial	Improved	31	Treat in the same manner as commercial	Convert the square footage from ProVal
	Unimproved	6		
Agricultural Ag Dwellings		166	Contract with Vanguard to sketch and link for ag dwellings	Convert the acres from ProVal
		8		
100% Exempted	Improved	375	There are limited to no sketches of exempt property so conversion of square footage if available	Convert square footage of land if available
	Unimproved	203		
Additional dwellings (2 nd dwlg on parcel)		C: 1 M: 2 R: 16	Contract with Vanguard to sketch and link all second dwelling on a separate sketch	Assume the land has already been resolved in other categories as this is a second dwelling

Date: August 9, 2021
To: Ames City Assessor Staff
Re: Data request # 1 High level description and parcel counts
From: J.G. Roisen MA, CAE, Division Administrator Local Government Services
Due Date: Week of August 9th negotiate deadline and responsible party
Received: August 19, 2021

1. Data: please describe in this document and be prepared to discuss
 - a. High level view of how data is managed and processed
 - i. DOVs: **Appraisal Techs process page 1; Lisa batch processes page 2; Appraisal Techs do QC on page 2 (temporarily, until confident process is reliable); appraisers follow up on sale ratios below 85% and above 115%.**
 - ii. CAMA (and all associated data including photos, sketches): **Permits reacted to by appraisers, entering sketches and data. Currently, if photo is needed, appraiser tags it with a "Phot" memo. Currently utilizing Excel valuation sheet, based off of regression model. (Had planned to replicate model within Proval in order to price on the fly, but it was never done.) Photos periodically picked up by Temp, using Mobile Assessor tool and sync'd to Proval.**
 - iii. Permits/Inspections: **Lisa has process to import permits from Inspections' EnerGov permitting system. Appraisers work off of their list, highest dollar value to lowest dollar value.**
 - iv. Other if applicable: **Subdivisions, splits, merges processed by Dan using Excel worksheets and subsequently finished in Incode 10 and Proval.**
 - b. High level view of how data is integrated with tax administration. **Nightly SQL import of real estate file and linked to Access DB. Values and reconciliation are done in Incode 10, and final values and value types imported to Proval CAMA system.**

- c. High level view of how data is integrated with Beacon website. **Real estate data from Incode 10 updated to Schneider nightly. Proval data to Schneider weekly. Microsolve data (inventory and sales files) to Schneider monthly.**
 - i. Are there parcel records not presented on Beacon website; if so, how many?
I'm unaware of any active parcels not showing up on Beacon, but sometimes there are "tricks" to get some to display. Buildings on leased land (cell towers, billboards, some garages, etc.) will display if you know how Beacon works. Also, when parcels are being split/merged some portion of their data becomes orphaned, and it can be tricky to get the data, because the map is updated before there is data in the real estate system to match.
- d. High level view of how data is integrated with GIS. **Scott in the Auditor's office updates the map. Patti in the Auditor's office subsequently creates the parcels. Dan in our office finishes the splits/merges and enters the basic data into Proval. The Map IDs and Parcel IDs in the CAMA systems tie the data to the Map IDs and Parcel IDs in the GIS.**
- e. Total parcel count taxable: **22,095**
 - i. Improved: **21,296**
 - ii. Unimproved: **799**
- f. Total parcel count fully exempt: **578**
 - i. Improved: **147**
 - ii. Unimproved: **431**
- g. Software system summary: Please identify the vendor and describe briefly
 - i. CAMA: Microsolve-Retiring; Proval
 - ii. Tax Administration
 - iii. Mapping
 - iv. Website
 - v. Land Records
 - vi. Other?

- Note 1: Slight difference in area due to survey precision.
- Note 2: Combined parcels due to new survey. Instrument #2018-04082
- Note 3: No changes in value for 2018 due to reconfiguration. Need to revalue for 2019 assessment.
- Note 4: Unable to obtain accurate SF for 10-05-300-110 from surveyor; consulted City GIS for square footage for parcel.
- Note 5: Need New BPTC Application due to change in legal description

RE: Consolidated Condos

1 message

Henschel, Lisa <lisa.henschel@cityofames.org> Wed, Aug 25, 2021 at 2:40 PM
To: "Roisen, Julie" <julie.roisen@iowa.gov>, "Schildroth, Deb" <deb.schildroth@cityofames.org>
Cc: "Swaim, Brenda" <brenda.swaim@cityofames.org>

Attached are those parcels classed as co-ops where the MailOwnerName is the same for multiple parcels. If all of the owners agree, it will reduce 78 parcels to 24.

Thanks!

Lisa Henschel

tax.iowa.gov

Date: August 9, 2021

To: Ames City Assessor Staff

Re: Data request # 4 Missing data or information

From: J.G. Roisen MA, CAE, Division Administrator Local Government Services

Due Date: Week of August 9th negotiate deadline and responsible party

Received: August 18, 2021

4. Property records and disparate or missing information
 - a. Commercial records 682 where there is missing data
 - i. Please provide a list of the 682 parcel records referenced
Please see DR4a_CommercialDataIntegrityReport.pdf. NOTE: Many are the same parcel listed multiple times for different reasons (i.e. once for each floor of the building). All are Commercial buildings, including condominium complexes. Condominiums were the last building segment needing to be entered into Proval.
 - ii. Please be prepared to review the CAMA system information with me on the 19th.
Even if I were given sufficient time, I'm unsure how to prepare. Current staff has not really worked on commercially-priced parcels outside of the land tab and attempting to defend the values of some parcels.
 - iii. Please be prepared to provide supporting documentation in regard to the valuations of these records assuming it exists in a separate format **Can demonstrate how to retrieve documents stored in Laserfiche and attached to the parcels.**
 - iv. Please be prepared to review the "boxes" of commercial plans or projects that are "unopened". If this information is contained in an alternate separate format please be prepared to demonstrate this as well. **These are physical plans we have saved on site, due to our storage shed being razed last year, the Assessor not being on site much of 2020, and the Inspections Department purging plans. Brenda Swaim thought it would be best to hang onto them until someone (new Assessor and/or an intern) had a chance to go through them to ensure the data had been captured. After someone has affirmed the data is in the system or entered it in the system, we need to notify the Ames History Museum, and they will pick them up.**
 - b. Residential condos

- i. Please be prepared to review the CAMA system information with me on the 19th. **Condominiums are a mixed bag. Some are in the Microsolve CAMA system; some were formerly apartments buildings and converted to condos, so they were entered into the Proval CAMA system; others were valued using an Excel worksheet and have no sketch in Proval.**
 - ii. Please be prepared to provide supporting documentation in regard to the valuation methods and documentation of these records assuming it exists in a separate format. **The worksheet may or may not be scanned/digitally attached to the parcel. We do not have all documents attached, as we've only been attaching documents in our document management system for about a year. If not attached, the file will need to be digitally located. I believe Dan can help with this.**
- c. Data integrity
 - i. There are 848 referenced records with "data integrity" issues. If you are aware of what this is in reference to please provide insight and a list of the 848 parcel records. **I believe this is the same list provided for DR4a; if it's not, I have no idea what is being referred to.**
 - ii. Please be prepared to show any CAMA information or the location of documentation of these records.
- d. There are 731 referenced records with no sketch in the CAMA system. Please be prepared to identify a list of which records these are in reference to. **Please reference DR4d_SketchDataEdit.txt.**
 - i. If data documentation for any of these records exists in an alternate format please be prepared to provide this information
- e. Parcels with no land value 126 and not exempt
 - i. Please be prepared to provide a list of records in regard to the parcels in question and address the lack of land value. **Please reference DR4e_ParcelsWithNoLandValue.xlsx.**
 - ii. If alternative data documentation exists please be prepared to provide
 - iii. If these are buildings on leased land please provide information
- f. Exempt parcels 711
 - i. 316 with no land valuation; please be prepared to provide what information exists on these records and a list of the parcels. **I believe these have been addressed as part of the other requests.**
 - ii. 395 with no sketch; please be prepared to provide what information exists on these records and a list of the parcels. **I believe these have been addressed as part of the other requests.**
- g. Reference to 16 pages of parcels with building permits where information has not been recorded in CAMA system
 - i. Please provide a list of the permits. **Please reference DR4g_PermitsNotInProval.xlsx.**
 1. What assessment year are the permits associated to? **2021**
 2. Have they been incorporated into the CAMA system at this time? **No; they are scheduled on a regular basis – either monthly or quarterly.**
 3. What action has been taken to keep current with the permits within the CAMA system. **They are kept up regularly, based on the schedule we set**

forth when the COA implemented EnerGov as their permitting software. Lisa can expound on this if you have further questions.

4. If the permits are applicable to the 2021 assessment, were inspections completed and valuations done for these 16 pages for the 2021 assessment? **I'm not familiar with the 16 pages being referenced, and I'm unaware of any permits that weren't addressed.**
 - ii. Please be prepared to review the permits with me on the 19th and review the CAMA system records in regard to these permits
 - iii. If alternative data documentation exists please be prepared to provide and explain to me how new construction is managed. **There is a Permits Report within the Proval CAMA system.**
 - iv. Please be prepared to discuss and show documentation for permitted new construction for 2022 and how it is being managed. **Tyler real estate system (INCODE 10) recently rolled up to 2022; we've not yet done any 2022 work. We have not yet rolled up our CAMA systems.**

[External Email]

Can you please confirm the following:

- 1. 09-16-200-065 has a sketch and if it is taxable

I didn't find that one. Which report is it from?

- 2. 09-15-200-075 has a sketch and if it is taxable

Mobile home park. Sketch has multiple extensions with data on C01, C02, C03, but not C04, C05, C06, C07 . It has taxable value.

- 3. 09-15-275-015 has a sketch and if it is taxable

Lumber Yard. Sketches for extensions C01, C02, C03. No sketches for C04 and C05. Has taxable value.

- 4. 09-16-425-090 does not have a sketch, if it is taxable and if there are spreadsheets that provide valuation methods

Has taxable value. No valuation documents in Laserfiche other than SalesVerification.

- 5. 09-16-428-050 does not have a sketch, if it is taxable and if there are spreadsheets that provide valuation methods

Has taxable value. Has sketch in PermitsPlans document, with value information.

- 6. 09-22-100-030 does not have a sketch, if it is taxable and if there are spreadsheets that provide valuation methods - appears to have a minimum assessment agreement

Has taxable value. Has valuation document as part of informal appeal.

- 7. 09-22-150-015 does not have a sketch, if it is taxable and if there are spreadsheets that provide valuation methods

Has blob instead of sketches. Has taxable value. Has valuation worksheet.

- 8. 09-12-100-015 has a sketch in ProVal, if it is taxable and if there are spreadsheets that provide valuation methods

Has taxable value. No spreadsheets in Laserfiche.

9. 09-12-476-077 no sketch in ProVal, if it is taxable and if there are spreadsheets that provide valuation methods

Has taxable value. Has cost letter and rough sketch. Valuation document as part of BOR appeal.

10. 20-06-400-275 no sketch in ProVal, if it is taxable and if there are spreadsheets that provide valuation methods

This Parcel id is wrong.

11. 10-07-310-050 no sketch in ProVal, if it is taxable and if there are spreadsheets that provide valuation methods (it appears to be a partial value for 2021)

Has taxable value. Has valuation worksheet.

12. 09-11-175-045 has a sketch in ProVal, if it is taxable and if there are spreadsheets that provide valuation methods

Has taxable value. Has no valuation worksheet.

If you could answer these questions it would be helpful.

Thank you,

Jewels

13. 09-08-225-015 please confirm this property has spreadsheets that provide valuation methodology

Has valuation worksheet.

14. 09-09-226-140 a newly constructed fraternity with no sketch but that this property has spreadsheets that provide valuation methodology

Has valuation worksheet

15. 09-17-110-000 is a condo with no sketch but can you please provide information that this property has spreadsheets that provide valuation methodology

Has cost letter

Thank you,

Jewels

Thank yo,

09-15-200-025 still isn't correct.

10-06-400-275 is taxable and has no valuation worksheet. It was annexed in 2017.

Twenty-five of exempt parcels with no FullTotalValue have had value in the past. One had a value in 2018. Most look to have been valued last in 2004.

Subject: Exempt parcels

[External Email]

Lisa,

Can you please verify that the exempt parcels has valuation on them even if the value is not contained in ProVal?

Thank you,

Jewels

For some parcels, yes. In Tyler, we have 961 exemption records with an exemption value of 242,594,700. However, of those 961 records, 307 have no exemption value at all.

Isn't there value in the tax administration system?

On Mon, Aug 30, 2021 at 1:19 PM Henschel, Lisa <lisa.henschel@cityofames.org> wrote:

HI Jewels,

For most exempt parcels, there is no valuation in any system. ☹️

Thanks!

3. Review of Vanguard implementation

- a. Please provide a copy of the conversion plan
- b. Please provide a data dictionary of conversion items provided to Vanguard
 - i. Listing and definition of fields provided as part of conversion
- c. Historical information plan
- d. Land Current CAMA System Data
 - i. Lot sizing method by classification
 1. Residential excluding condos. **75% Dwlg / 25% Land split**
 2. Condos. **Varies; those in Microsolve based off land factor (square root of land area) but trended; those valued using Excel worksheets usually valued based on sale price.**
 3. Commercial. **Algorithm with adjustments in Proval, but has subsequently been trended multiple times.**
 4. Industrial. **Algorithm with adjustments in Proval, but has subsequently been trended multiple times.**
 5. Agricultural. **CSR2 from county GIS; same price per CSR point as county, but last three times we've gotten equalization orders, and the county has not. I've been wondering if the exempt parcels (held by the state) are somehow throwing it off. The acres provided by Story County GIS are much greater than the acres in Tyler.**
- e. Sketches
 - i. Count of plot plans by classification. **No plot plans exist.**
 - ii. Count of existing sketches by classification.
 1. Residential excluding condos
11,678
 2. Condos
725
 3. Commercial
795

- 4. Industrial
18

d. Permits/Inspections			
2019 Permits/Inspections For staff please indicate who manages to put the information into the CAMA system and who does inspections. I'm really only interested in those permits that contribute to market value and not permits that require no effort on the part of staff.	Residential Count:	367	Residential Staff: Chris & Scott into Proval & inspections; Judy into Microsolve
	Condo Apt Count:	6	Condo Apt Staff: SAA

	Commercial Count: 122	Aggregate \$:356,317,073	Staff: Brenda S. & Brenda N.
	Industrial Count: 0	Aggregate \$: 0	Staff: N/A
	Agricultural Count: 0*	Aggregate \$: 0	Staff: Brenda
	100% Exempt Count: 2	Aggregate \$: 200,200	Staff: Brenda

*1 Ag & 1 Res low-income housing project included in Exempt count

- g. Appeals: please list any known PAAB or district court appeals that are outstanding and the associated year and classification. **See Addendum, "DR2g.xlsx"** Does the city attorney represent the assessor's office in the PAAB appeal process? **Yes.** Who on staff is responsible for PAAB appeals? **Assessor.** What other supporting roles are there in the appeals process and who is responsible as part of PAAB or district court cases? **Dan Boberg maintains the files and sends notices.**
- h. Is there an inspection cycle in place? If so, please describe the cycle and who is responsible for the inspections and planning: **There is not a cycle in place; the last time we went through the entire city Richard Horn did the planning & training initially; later Brenda Swaim trained & supervised the temporary workers over several summers (approx. 1996-early 2000s). A couple smaller scale efforts have been thwarted by staff leaving and COVID-19.**
- i. Software system administration: please indicate staff and describe the tasks
- a. Who manages the CAMA system administration? **Lisa and Brenda; Lisa now manages administration of Proval with little involvement from Brenda (posting of values, roll-up to new year, memo maintenance, depreciation tables, & any other maintenance needed); she adds/maintains integrated queries, reports, and Pictometry, as needed. Brenda updates Microsolve each year; monthly she takes parcel snapshots of sales and moves them to sales file and exports inventory file, sales file, and abbreviated sales file for use with GIS and Access DB.**
 - b. Who manages the tax administration integration and other integration functions? **Mostly Lisa now; Brenda used to and offers guidance as needed. Tax administration no longer**
 - c. Are there other systems?
 - i. GIS and mapping – **Lisa and Brenda, only as needed**
 - ii. Other? – **Pictometry integration – Mostly Lisa now; Brenda used to and offers guidance/suggestions, as needed.**
 - iii. Document management – **Laserfiche document repository, linking documents to parcels. Lisa attaches digital documents en masse (e.g. assessment notices). Theresa scans and/or attaches existing digital files.**
 - iv. Data Cloud Solutions mobile data collector – **iPads for appraiser/data collector field work; changes reviewed and approved/rejected by Brenda. Once approved, records in Proval are sync'd with updates.**

- v. **SPSS – Formerly used by Assessor for data analysis and modeling. Not currently being used.**
- d. **What types of queries from each system? Myriad; post parcel data online; fulfill data requests for other city departments, quality control checks, quarterly sales, etc.**
- e. **Ratio analysis? Proval, Microsolve, Access, Excel, SPSS (not currently being used).**
- f. **Who manages the valuation decisions and methods? Currently Brenda; formerly Assessor in collaboration with Brenda.**
- g. **Please describe in detail and be prepared to discuss the valuation methods and software used for each class of property. If alternative systems or methods outside of the CAMA system are used please describe and be prepared to discuss and demonstrate where the records are kept**
 - i. **Residential – Regression model supported with Excel worksheet**
 - ii. **Condos – Residential --Mixed bag; some in Microsolve & valued with feedback; some in Excel worksheets; all have been subsequently trended**
 - iii. **Commercial (incl comm condos) – As far as I know Marshall & Swift black box (in Proval) & often supported with Excel worksheets. Occasionally Proval work may not be complete but Excel worksheet contains the work.**
 - iv. **Industrial – Same as commercial**
 - v. **Agricultural – CSR in Proval; no conversion to CSR2; Matt Boeck submits Access DB from GIS Ag Soils program; Lisa uploads to Tyler. Ag Dwellings in Proval.**
 - vi. **100% Exempt – Many without attributes (Hospital, ISU, DOT, etc.); had planned to mail letters this year and get rid of the remaining “E classified” parcels, but the year is wasting away; I’d be surprised if it rises to the top this year. Any that are sketched/entered are using Marshall & swift Black Box in Proval.**
