

**AMES AREA METROPOLITAN PLANNING ORGANIZATION
TRANSPORTATION POLICY COMMITTEE**

SUBJECT: FINAL FFY 2023 - 2026 TRANSPORTATION IMPROVEMENT PROGRAM (TIP)

BACKGROUND:

To receive Federal program funds for transportation improvement projects, it is necessary for projects to be part of the approved statewide plan. The initial step in this process is for the Ames Area MPO to develop a Transportation Improvement Plan (TIP). The TIP includes four-years of programming, and a new TIP is created annually. Projects included in the TIP involve street improvements, transit projects, and trail projects. In spring 2022, the Ames Area MPO distributed regional applications for new funding for Surface Transportation Block Grant (STBG) and Transportation Alternative Program (TAP) projects. These were due on March 31.

STBG (Surface Transportation Block Grant) Applications:

Two (2) applications were received for regional STBG funding.

TPMS ID	Project Sponsor	Project Name	Federal Fund Request	Total Project Cost	Year
52481	City of Ames	Bloomington Rd Pavement Improvements (GW Carver – Eisenhower)	\$1,400,000	\$1,960,000	FFY26
52480	CyRide	Vehicle Replacement	\$225,000	\$908,960	FFY26

Total New STBG Requests: \$1,625,000

TAP (Transportation Alternatives Program) Applications:

One (1) application was received for regional TAP funding.

TPMS ID	Project Sponsor	Project Name	Federal Fund Request	Total Project Cost	Year
52482	City of Ames	S Dayton Ave Path (Isaac Newton Dr – E Lincoln Way)	\$520,000	\$650,000	FFY26

Total New TAP Requests: \$520,000

MPO Staff have reviewed the received applications to ensure conformity to the 2045 Metropolitan Transportation Plan (MTP) and regional transportation planning goals. **The recommendation is to fully award the requested amounts for the project applications.**

FISCAL CONSTRAINT:

The following tables demonstrate fiscal constraint for STBG and TAP funding programs in fiscal years 2023 through 2026 by summarizing anticipated new funding targets and programmed projects amounts. A map and full list of the programmed projects are shown starting on page 21 (highway/trail projects) and page 25 (transit projects) of the attached TIP document.

STBG Fiscal Constraint

	2023	2024	2025	2026
UNOBLIGATED BALANCE (CARRYOVER)	\$3,944,621	\$404,579	\$1,556,579	\$330,579
STBG TARGET	\$1,860,958	\$1,897,000	\$1,933,000	\$1,971,000
SUBTOTAL	\$5,805,579	\$2,301,579	\$3,489,579	\$2,301,579
PROGRAM FUNDS	\$5,401,000	\$745,000	\$3,159,000	\$1,625,000
BALANCE	\$404,579	\$1,566,579	\$330,579	\$676,579

TAP Fiscal Constraint

	2023	2024	2025	2026
UNOBLIGATED BALANCE (CARRYOVER)	\$19,157	\$195,697	\$335,697	\$559,697
TAP TARGET	\$176,540	\$180,000	\$184,000	\$188,000
SUBTOTAL	\$195,697	\$375,697	\$559,697	\$747,697
PROGRAM FUNDS	\$0	\$0	\$0	\$520,000
BALANCE	\$195,697	\$375,697	\$559,697	\$227,697

DEVELOPMENT SCHEDULE:

The Transportation Policy Committee unanimously approved the Draft TIP on May 24, 2022. During the public comment period, the draft document and projects map were available online and a virtual public input session was held. **No public comments were received by staff. Staff received and addressed minor comments from the Iowa Department of Transportation.** The Final FFY 2023-36 TIP is due to the Iowa Department of Transportation by July 15, 2022. Once approved, this TIP will become effective starting October 1, 2022, and will be incorporated in the statewide TIP.

ALTERNATIVES:

1. Approve the Final FFY 2023-2026 Transportation Improvement Program for submission to the Iowa Department of Transportation.
2. Approve the Final FFY 2023-2026 Transportation Improvement Program, with Transportation Policy Committee modifications, for submission to the Iowa Department of Transportation.

ADMINISTRATOR'S RECOMMENDATION:

The FFY 2023-36 TIP was open to public comment and was reviewed by State and Federal agency partners. All received comments were incorporated into the final document. Therefore, it is recommended by the Administrator that the Transportation Technical Committee adopt Alternative No. 1, as shown above.

FINAL FFY 2023-2026 Transportation Improvement Program

AMES AREA METROPOLITAN PLANNING ORGANIZATION

AMES | GILBERT | STORY | BOONE

The Ames Area Metropolitan Planning Organization prepared this report with funding from the U.S. Department of Transportation's Federal Highway Administration and Federal Transit Administration, and in part through local matching funds of the Ames Area MPO member governments. These contents are the responsibility of the Ames Area MPO. The U.S. government and its agencies assume no liability for the contents of this report or for the use of its contents. The Ames Area MPO approved this document on July 12, 2022. Please call (515) 239-5160 to obtain permission to use.

1 - Introduction

1.1 Document Overview

The Federal Fiscal Year 2023 - 2026 Transportation Improvement Program (TIP) is the short-range implementation program for federally funded and regionally significant transportation projects. The TIP is a requirement of 23 CFR 450.326 for metropolitan planning organizations to develop a program, covering at least four years, which reflects the investment priorities established in the metropolitan transportation plan. The Ames Area Metropolitan Planning Organization (AAMPO) develops a new TIP annually in coordination with the Iowa Department of Transportation (DOT), Federal Highway Administration (FHWA), Federal Transit Administration (FTA), the City of Ames, the City of Gilbert, Story County, Boone County, Ames Transit Agency (CyRide), other local agencies and stakeholders, as well as the public. The Ames Area TIP is included in the State Transportation Improvement Program (STIP), which is developed by the Iowa Department of Transportation.

1.2 AAMPO Overview and Planning Area

AAMPO was officially designated the MPO of the Ames urbanized area by the Governor of Iowa in March 2003. This designation was the result of the Ames urbanized area having a population greater than 50,000 in the 2000 Census.

As a result of the 2010 Census, the urbanized areas of Ames and Gilbert were combined into one urbanized area, therefore requiring the Metropolitan Planning Area to be expanded to encompass this area in its entirety. The Ames Area MPO approved the current Metropolitan Planning Area boundary on November 13, 2012 (shown in **Figure 1**). The City of Gilbert and Iowa State University were added to the Transportation Policy Committee on March 26, 2013.

Figure 1: AAMPO Boundary (Adopted Nov 13, 2012)

The Ames Area MPO provides and coordinates various transportation planning and improvement efforts throughout the Ames urban area.

Ames is in central Iowa and is served by Interstate 35, US Highway 30, and US Highway 69. Surface transportation needs are met through over 251 centerline miles of streets. The community has a very progressive transit system, CyRide, which prior to the COVID-19 pandemic carried more than six million bus passengers each year. CyRide’s ridership dropped to 4.57 million passengers in FY 2020 and then 1.86 million in FY 2021 because of reduced travel within the Ames community. CyRide believes ridership levels will increase back to approximately 3.5 million passengers by the end of FY 2022. Since over 90% of CyRide’s ridership is university students, future transit ridership increases will heavily depend upon how many classes are held in-person on campus instead of virtually. While most transit users have Iowa State University ties, CyRide serves the entire Ames community. The Ames Area MPO area includes the Ames Municipal Airport, which serves general aviation needs for business, industry, and recreation users. On average, 145 aircraft operations occur per day at the Ames Municipal Airport. Railroads provide freight service to the area by dual east-west mainline tracks and a northern agricultural spur.

The Ames Area MPO consists primarily of two standing committees: The Transportation Policy Committee and the Transportation Technical Committee.

1.3 Transportation Policy Committee

The Transportation Policy Committee (TPC) is the policy setting board of the MPO and the membership consists of local officials. Voting membership on the committee includes city and county governments located, wholly or partially, in the Ames Area MPO planning boundary, as well as the local transit agency. Currently the TPC membership includes: City of Ames, City of Gilbert, CyRide, Boone County, and Story County. The Iowa Department of Transportation, Federal Highway Administration, Federal Transit Administration, and Iowa State University serve as advisory, non-voting, representatives.

Transportation Policy Committee Membership		
<i>Representative Agency</i>	<i>Member</i>	<i>Representative Agency Role</i>
City of Ames (Chair)	John Haila	Mayor
City of Ames	Bronwyn Beatty-Hansen	Council Member
City of Ames	Gloria Betcher	Council Member
City of Ames	Amber Corrieri	Council Member
City of Ames	Tim Gartin	Council Member
City of Ames	Anita Rollins	Council Member
City of Ames	Rachel Junck	Council Member
Boone County	Bill Zinnel	Board of Supervisors
Story County	Linda Murken	Board of Supervisors
Ames Transit Agency (CyRide)	Jacob Ludwig	CyRide Board Member
City of Gilbert	Jonathan Popp	Mayor
Iowa Dept. of Transportation ‡	Andy Loonan	District 1 Transportation Planner
Iowa Dept. of Transportation ‡	Zac Bitting	Metropolitan and Regional Planning Coordinator
Iowa Dept. of Transportation ‡	Cindy Shearer	Statewide Planning Support
Federal Highway Administration ‡	Darla Hugaboom	Iowa Division Community Planner
Federal Highway Administration ‡	Sean Litteral	Planning and Development Team Leader

Federal Transit Administration ‡	Daniel Nguyen	Region 7 Community Planner
Iowa State University ‡	Brandi Latterell	Director for Planning Services

‡ Non-voting

1.4 Transportation Technical Committee

The Transportation Technical Committee (TTC) consists of technical personnel from various agencies involved in transportation issues within the planning area. The TTC formulates the procedural details of the Transportation Planning Work Program. The committee reviews and monitors the output of various MPO activities identified in the work program and makes recommendations to the policy committee. The committee is also responsible for assisting in developing the short and long-range transportation plans. The Iowa Department of Transportation, the Federal Highway Administration, and the Federal Transit Administration serve as advisory, non-voting, representatives.

Transportation Technical Committee Membership		
<i>Representative Agency</i>	<i>Member</i>	<i>Representative Agency Role</i>
City of Ames (Chair)	Damion Pregitzer	Traffic Engineer
City of Ames (Vice-Chair)	Justin Moore	Planner
City of Ames	Justin Clausen	Operations Manager
City of Ames	Kelly Diekmann	Director of Planning & Housing
City of Ames	Tracy Peterson	Municipal Engineer
Ames Transit Agency (CyRide)	Barb Neal	Transit Director
Iowa State University	Sarah Lawrence	Campus Planner
Boone County	Scott Kruse	County Engineer
Story County	Darren Moon	County Engineer
Ames Community School Dist.	Gerry Peters	Facilities Director
Ames Economic Development Commission	Dan Culhane	President & Chief Executive Officer
Iowa Dept. of Transportation ‡	Andy Loonan	District 1 Transportation Planner
Iowa Dept. of Transportation ‡	Zac Bitting	Metropolitan and Regional Planning Coordinator
Iowa Dept. of Transportation ‡	Cindy Shearer	Statewide Planning Support
Federal Highway Administration ‡	Darla Hugaboom	Iowa Division Community Planner
Federal Highway Administration ‡	Sean Litteral	Planning and Development Team Leader
Federal Transit Administration ‡	Daniel Nguyen	Region 7 Community Planner

‡ Non-voting

2 - Public Participation

This document was developed in coordination with AAMPO member agencies, regional stakeholders, and members of the public using the process described in the [AAMPO Public Participation Plan](#). This process includes strategies to disseminate information about the project selection process and provides opportunities for interested parties to provide information to the policy committee.

2.1 Website

The Ames Area MPO utilizes its website at www.aampo.org to make documents, maps, and other materials accessible anytime of any day in a format that is adaptable to mobile devices and website text which can be translated into any language available through translation services. There is a subpage of the website dedicated to the [Transportation Improvement Program](#). Here, both current and past versions of Transportation Improvement Programs can be found, and public meetings and comment opportunities are posted.

2.2 Outreach

Anyone may sign-up to receive notifications of news and events published from the MPO with an e-notification system. During the development of this program, users received e-notifications pertaining to FFY 2023-2026 TIP public meetings, public comment periods, and draft documents.

Additionally, AAMPO utilizes local publications, such as the Ames Tribune, to publicize public input opportunities and public hearing dates.

2.3 Public Involvement Opportunities

There were three primary opportunities for public involvement and feedback including:

- **Public Input Session:** A public input session provided members of the public the opportunity to drop-in to view projects, meet with staff, and leave comments on the proposed program. The event, hosted on May 25, 2022, was held virtually via Microsoft Teams. No formal presentation was given allowing for visitors to come and go at any time during the event.
- **Public Comment Period:** A public comment period was made available from May 25, 2022, to June 30, 2022. The draft TIP document was made available online and members of the public could submit their comments on the draft document or listed projects via email or via mail. Public comments received by staff are shown in **Appendix E**.
- **Public Hearing:** During the July 12, 2022, Transportation Policy Committee meeting, a public hearing was held prior to final adoption of this TIP. This hearing provided time for anyone to address the committee prior to consideration and adoption of the TIP. Public participants could join the meeting via Zoom. Transportation Policy Committee meetings are currently livestreamed on Ames Channel 12 and on YouTube.

3 - Performance-Based Planning

3.1 Overview

With the passing of the Moving Ahead for Progress in the 21st-Century (MAP-21) transportation bill, and continuing in the FAST-Act, states and MPOs are required to use performance-based transportation planning practices. MPO Transportation Improvement Programs are required to document compliance with each of the performance-based planning categories including safety (PM1), pavement and bridge (PM2), system and freight reliability (PM3), transit asset management, and transit safety.

3.2 Safety (PM1)

Compliance with safety performance-based planning requirement began May 27, 2018, for MPOs. MPOs can choose to support the DOT safety targets or the MPOs can set their own unique targets. Rather than setting its own safety targets, AAMPO has chosen to support the Iowa DOT's safety targets as published in the most recent [Iowa Highway Safety Improvement Program Annual Report](#) and shown in **Table 1**. The MPO supports those targets by reviewing and programming all Highway Safety Improvement Program (HSIP) projects within the MPO boundary that are included in the DOT's TIP.

Any Iowa DOT Sponsored HSIP projects within the MPO area were selected based on the strategies included in the Strategic Highway Safety Plan and safety performance measures and were approved by the Iowa Transportation Commission. The Iowa DOT conferred with numerous stakeholder groups, including AAMPO, as part of its target setting process. Working in partnership with local agencies, Iowa DOT safety investments were identified and programmed which will construct effective countermeasures to reduce traffic fatalities and serious injuries. The Iowa DOT projects chosen for HSIP investment are based on crash history, roadway characteristics, and the existence of infrastructure countermeasure that can address the types of crashes present. The Iowa DOT continues to utilize a [systemic safety improvement process](#) rather than relying on "hot spot" safety improvements.

Table 1: Safety (PM1) Targets (adopted by AAMPO on 10/26/21)

Performance Measure	Five Year Rolling Averages	
	2016-2020 Baseline	2018-2022 Target
Number of Fatalities	345.2	337.8
Fatality Rate – per 100 million VMT	1.053	1.037
Number of Serious Injuries	1,391.6	1,327.2
Serious Injury Rate – per 100 million VMT	4.241	4.073
Non-Motorized Fatalities and Serious Injuries	128.6	129.8

3.3 Pavement and Bridge (PM2)

Compliance with PM2 performance-based planning requirements began on May 20, 2019, for MPOs. MPOs can choose to support the DOT PM2 targets, or they can set their own unique targets. Rather than setting its own pavement and bridge targets, the AAMPO has chosen to support the Iowa DOT’s pavement and bridge targets as submitted in the most recent [baseline period performance report](#) and shown in **Table 2**. The MPO supports those targets by reviewing and programming all Interstate and National Highway System projects within the MPO boundary that are included in the DOT’s Transportation Improvement Program.

Any Iowa DOT sponsored pavement and bridge projects within the MPO area were determined in alignment with the Iowa Transportation Asset Management Plan (TAMP) and the pavement and bridge performance measures. The TAMP connects Iowa in Motion 2045 and system/modal plans to Iowa DOT’s Five-Year Program and the STIP. Iowa in Motion 2045 defines a vision for the transportation system over the next 20 years, while the Five-Year Program and STIP identify specific investments over the next four to five years. The TAMP has a 10-year planning horizon and helps ensure that investments in the Five-Year Program and STIP are consistent with Iowa DOT’s longer-term vision. Starting in 2019, the TAMP began to integrate the pavement and bridge performance targets.

The Iowa DOT conferred with numerous stakeholder groups, including the AAMPO and local owners of NHS assets, as part of its target setting process. The methodology used to set targets used current and historical data on condition and funding to forecast future condition. Asset management focuses on performing the right treatment at the right time to optimize investments and outcomes. Management systems are utilized to predict bridge and pavement needs and help determine the amount of funding needed for stewardship of the system. The TAMP discusses the major investment categories that the Commission allocates funding through. Once the Iowa Transportation Commission approves the funding for these categories, the Iowa DOT recommends the allocation of the funds to specific projects using the processes described in the TAMP. Pavement and bridge projects are programmed to help meet the desired program outcomes documented in the TAMP.

Table 2: Pavement and Bridge (PM2) Targets (adopted by AAMPO on 09/25/18)

Performance Measure	2017 Baseline	4 Year Targets
Percentage of pavements of the Interstate System in Good condition	N/A	49.4%
Percentage of pavements of the Interstate System in Poor condition	N/A	2.7%
Percentage of pavements of the non-Interstate NHS in Good condition	50.9%	46.9%
Percentage of pavements of the non-Interstate NHS in Poor condition	10.6%	14.5%
Percentage of NHS bridges classified as in Good condition	48.9%	44.6%
Percentage of NHS bridges classified as in Poor condition	2.3%	3.2%

3.4 System and Freight Reliability (PM3)

Compliance with PM3 performance-based planning requirements began on May 20, 2019, for MPOs. MPOs can chose to support the DOT PM3 targets or MPOs can set their own unique targets. Rather than setting its own system and freight reliability targets, the AAMPO has chosen to support the Iowa DOT’s system and freight reliability targets as submitted in the most recent [baseline period performance report](#) and shown in **Table 3**. The MPO supports those targets by reviewing and programming all Interstate and National Highway System projects within the MPO boundary that are included in the DOT’s Transportation Improvement Program.

The Iowa DOT conferred with numerous stakeholder groups, including AAMPO, as part of its target setting process. Variability within the existing travel time dataset was used to forecast future condition. Projects focused on improving pavement and bridge condition also often help improve system reliability and freight movement. Additional projects focused specifically on improving these areas of system performance are developed in alignment with the target-setting process for related performance measures, and the freight improvement strategies and freight investment plan included in the State Freight Plan. This plan includes a detailed analysis and prioritization of freight bottlenecks, which are locations that should be considered for further study and possibly for future improvements. The process also involved extensive input from State, MPO, RPA, and industry representatives. State projects identified in the freight investment plan and programmed in the STIP were highly ranked freight bottlenecks.

Table 3: System and Freight Reliability (PM3) Targets (adopted by AAMPO on 03/23/21)

Performance Measure	2017 Baseline	4 Year Targets
Percent of the person-miles traveled on the Interstate that are reliable	100%	98.5%
Percent of the person-miles traveled on the non-Interstate NHS that are reliable	N/A	95.0%
Truck Travel Time Reliability (TTTR) Index	1.12	1.21

3.5 Transit Asset Management

Compliance with transit asset management performance-based planning requirements began on October 1, 2018. MPOs can choose to support the targets set by their local urban transit provider or set their own unique targets. The AAMPO has chosen to support the targets set by the region’s transit provider, CyRide as shown in **Table 4**. CyRide publishes these targets in their own TAM plan which they review and amend, if needed, each fall by October 1st. The infrastructure performance measure element which FTA requires is limited to rail fixed guideway assets of which there is not any rail passenger service with Ames.

Table 4: Transit Asset Management Targets (adopted by AAMPO on 10/26/21)

TAM Performance Measure Class	2021 Target	2021 Year-End Results	2022 Performance Target	2023	2024	2025	2026
Revenue Vehicles 40'-60' Buses	42%	40%	30% of fleet exceeds CyRide's ULB of 15 yrs.	26%	20%	34%	22%
Revenue Vehicles Cutaways	22%	89%	22% of fleet exceeds FTA ULB of 8 yrs.	0%	0%	0%	0%
Revenue Vehicles Minivans	0%	0%	0% of fleet exceeds FTA ULB of 8 yrs.	0%	0%	0%	0%
Equipment Shop Trucks	50%	0%	0% of fleet exceeds CyRide's ULB of 10 yrs.	0%	0%	0%	0%
Facilities Admin./Maint.Facility	0%	0%	0% of facilities rated under 3.0 on TERM scale	0%	0%	0%	0%
Facilities Ames Intermodal Facility	0%	0%	0% of facilities rated under 3.0 on TERM scale	0%	0%	0%	0%

Public transit capital projects included in the STIP align with the transit asset management (TAM) planning and target setting processes undertaken by the Iowa DOT, transit agencies, and MPOs. The Iowa DOT establishes a group TAM plan and group targets for all small urban and rural providers while large urban providers (i.e. CyRide) establish their own TAM plans and targets. Investments are made in alignment with TAM plans with the intent of keeping the state’s public transit vehicles and facilities in a state of good repair and meeting transit asset management targets. The Iowa DOT allocates funding for transit rolling stock in accordance with the Public Transit Management System process. In addition, the Iowa DOT awards public transit infrastructure grants in accordance with the project priorities established in Iowa Code chapter 924. Additional state and federal funding sources that can be used by transit agencies for vehicle and facility improvements are outlined in the funding chapter of the Transit Manager’s Handbook. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

3.6 Transit Safety

Compliance with transit safety performance-based planning requirements begins on July 20, 2021. MPOs can choose to support the targets set by their local urban transit provider or set their own unique targets. AAMPO has chosen to support the targets set by the region’s transit provider, CyRide as shown in **Table 5**. CyRide publishes these targets in their Public Transportation Agency Safety Plan (PTASP), which will be certified each year.

Table 5: Transit Safety Targets (adopted by AAMPO on 10/26/21)

Mode of Transit Service	Fatalities (Total)	Fatalities (per 100 thousand VRM)	Injuries (Total)	Injuries (per 100 thousand VRM)	Safety Events (Total)	Safety Events (per 100 thousand VRM)	System Reliability (VRM/Failures)
Fixed Route Bus	0	0	0	0.00	0	0.00	42,273.16
Paratransit	0	0	0	0.00	0	0.00	38,450

Public transit projects included in the STIP align with the transit safety planning and target setting processes undertaken by the transit agencies and MPOs. While the Iowa DOT aided with the development of the initial Public Transportation Agency Safety Plans (PTASPs), each large urban transit provider is responsible for implementing its PTASP, which includes transit safety targets. Investments are made in alignment with PTASPs with the intent of keeping the state’s public transit operations, vehicles, and facilities safe and meeting transit safety targets. State and federal funding sources that can be used by transit agencies for operations, vehicles, and facility improvements are outlined in the funding chapter of the Transit Manager’s Handbook. Individual transit agencies determine the use of these sources for capital and operating expenses based on their local needs.

3.7 Regional Transportation Goals

In AAMPO’s latest Metropolitan Transportation Plan, [Forward 45](#), a performance-based transportation planning approach was utilized by tying in the regional vision of the transportation system with the aforementioned federally-required metrics and federally-required planning processes. The six primary region-specific goals, identified from public input, were accessibility, safety, substantiality, efficiency & reliability, placemaking, and preservation. The [Forward 45 Report](#) provides a detailed explanation of the regional goals and objectives as well as the performance-based planning approach utilized in the identification, selection, and prioritization of projects.

The vision statement stated in Forward 45 is:

*“The Ames area future transportation plan delivers **safe, efficient and reliable** solutions that are **accessible** to all users. The plan focuses on **preserving** the existing network and shaping the public realm through **placemaking**, while providing long-term **sustainability**.”*

3.8 Air Quality

The Clean Air Act requires the United States Environmental Protection Agency (EPA) to set limits on how much of a particular pollutant can be in the air anywhere in the United States. National Ambient Air Quality Standards (NAAQS) are the pollutant limits set by the Environmental Protection Agency; they define the allowable concentration of pollution in the air for six different pollutants: Carbon Monoxide, Lead, Nitrogen Dioxide, Particulate Matter, Ozone, and Sulfur Dioxide.

The Clean Air Act specifies how areas within the country are designated as either “attainment” or “non-attainment” of an air quality standard and provides the EPA the authority to define the boundaries of nonattainment areas. For areas designated as non-attainment for one or more National Ambient Air Quality Standards, the Clean Air Act defines a specific timetable to attain the standard and requires that non-attainment areas demonstrate reasonable and steady progress in reducing air pollution emissions until such time that an area can demonstrate attainment.

No part of the Ames Area is within nonattainment; therefore, it is not subject to air quality conformity requirements. However, the Ames Area MPO will perform activities to monitor and promote air quality issues in the region. The State of Iowa provides grant opportunities through the Iowa Clean Air Attainment Program (ICAAP) to promote clean air in Iowa’s transportation system.

4 - Project Selection

4.1 Overview

This Transportation Improvement Program (TIP) serves as a list of federal-aid eligible transportation improvements within the Ames region from the federal fiscal years 2023 to 2026. Projects in the Ames Area MPO's TIP must be consistent with the latest regional Metropolitan Transportation Plan, [Forward 45](#). The final AAMPO TIP, approved by the AAMPO Transportation Policy Committee, will be consolidated into the State Transportation Improvement Program (STIP) along with the programs from the other planning agencies in the State of Iowa.

Projected identified in this TIP utilize, or are based upon, several different sources of federal funding. While AAMPO is responsible for the regional selection of projects eligible for STBG and TAP funding, which the undermentioned selection procedure discussions will focus on, there are several other Federal and State funding programs which are listed and described in **Appendix C**.

4.2 Regional Applications

AAMPO solicits regional applications for two primary transportation funding programs: Surface Transportation Block Grant (STBG) and Iowa's Transportation Alternatives Program (TAP). For projects to be eligible for these applications, they must conform with the latest regional Metropolitan Transportation Plan, [Forward 45](#). Both these applications are made available on the AAMPO website at www.aampo.org. A notification email is also sent out to contacts from all the AAMPO regional member agencies that are eligible to apply. These applications are due annually on March 31st. The application templates for both STBG and TAP can be found in **Appendix D**.

4.3 STBG Selection Criteria

STBG funds are typically awarded to projects which improve capacity through construction, reconstruction, and rehabilitation of the highway network. However, Transit capital projects are also eligible for STBG funds. Projects must be listed in, or conform with, the latest Metropolitan Transportation Plan. All projects are evaluated and prioritized within the Metropolitan Transportation Plan using a performance-based planning process. This evaluation is heavily weighed when determining whether to award STBG funding to a project. Staff will make an initial review of all received STBG applications. Next, the Transportation Technical Committee (TTC) collectively reviews and recommends to the Transportation Policy Committee which projects should be selected.

4.4 TAP Selection Criteria

Regional TAP funds are generally awarded to smaller-scale projects such as pedestrian and bicycle facilities, recreational trails, and safe routes to school projects. Like the STBG funding selection process, TAP projects must conform to the latest Metropolitan Transportation Plan (MTP) and the performance-based evaluation results in the MTP are weighed heavily in the TAP selection process. TAP projects should provide connectivity with existing facilities, provide a reasonable cost in relation to public benefit, and enhance the current transportation system. Like the STBG funding selection process, staff

makes an initial review of the received applications. Next, the Transportation Technical Committee (TTC) reviews and recommends to the Transportation Policy Committee which projects should be selected.

4.5 Transit Projects

In addition to FHWA program projects, the TIP includes all projects which Federal Transit Administration (FTA) funding may be utilized. A portion of Federal fuel tax revenue is placed in the mass transit account of the Federal Highway Trust Fund for this use. These funds, along with General Fund appropriations, are reserved for transit purposes and are administered by the Federal Transit Administration. The transit portion of the TIP was developed in cooperation with CyRide, the urban transit operator in the Ames Area MPO planning area. The transit projects identified in the FFY 2023-2026 TIP were included within the [Passenger Transportation Plan](#) (PTP), meeting the requirement to have the Enhanced Mobility for Seniors and Individuals with Disabilities formulated Federal funding within an approved PTP prior to TIP approval. Please refer to pages 25-32 for the transit project justifications for FFY 2023 as well as the list of transit projects programmed for FFY 2023-2026.

5 - FFY 2022 Project Status Report

It is required to provide a status report for all federal-aid and Swap funded highway projects included in the first fiscal year or the previous TIP. This status report indicates whether the project was authorized/let, is being rolled over to the current TIP, or if the project is being removed from programming. This status report is useful for monitoring the progress being made in implementing the MPO's transportation program. See **Table 6** for the project status report for FFY 2022.

Table 6: FFY 2022 Project Status Summary

Funding Source	TPMS ID	Project Description	Federal-Aid	Total Cost	Local Sponsor	Status
STBG	38304	CyRide: Vehicle Replacement	\$225,000	\$850,000	CyRide	Authorized
SWAP-STBG	36919	Cherry Ave (E Lincoln Way – SE 5 th St)	\$1,890,000	\$2,400,000	City of Ames	Roll-Over to FFY 2023 (STBG)
SWAP-STBG	38303	Stange Rd (Blankenburg Dr to 24 th St) & 24 th St (Pinehurst Rd to Hayes Ave)	\$1,600,000	\$4,200,000	City of Ames	Roll-Over to FFY 2023 (STBG-SWAP)
SWAP-STBG	35616	N Dakota Ave (S Ontario St – 0.2 N of RR Tracks)	\$900,000	\$1,500,000	City of Ames	Letting on 03/15/22
TAP	38306	Vet Med Trail (S Grand Ave – S 16 th St)	\$159,000	\$500,000	City of Ames	Letting on 06/21/22
TAP	19249	Ioway Creek Trail (0.5mi E of S Duff Ave – S 5 th St)	\$560,000	\$1,082,000	City of Ames	Letting on 09/20/22
SWAP-CMAQ	45239	1 st Phase of Ames Traffic Signal Master Plan	\$1,176,518	\$1,470,648	City of Ames	Letting on 06/21/22
SWAP-CMAQ	48394	2 nd Phase of Ames Traffic Signal Master Plan	\$1,400,000	\$1,750,000	City of Ames	Letting on 06/21/22
CMAQ	52477	CyRide: Transit Operations for Various Routes	\$89,697	\$112,122	CyRide	Authorized
PL	34214	Trans Planning	\$101,260	\$126,575	AAMPO	Authorized

6 - Financial Analysis

6.1 Overview

Projects programmed in the current TIP must demonstrate fiscal constraint. This section focuses on demonstrating that the program is fiscally constrained as well as documents nonfederal-aid revenues and expected operations and maintenance costs on the federal-aid system. All project costs are adjusted into year of expenditure dollars using an assumed annual inflation rate of 4 percent. This same inflation rate is used to project revenues and operations and maintenance costs. PL funds are shown to remain constant through the 4-year period and are based on the first fiscal year's target.

The Iowa DOT provides AAMPO with STBG, TAP, and STBG/TAP Flex funding targets for each of the four years in this program. The Iowa DOT also provides information from their five-year program including estimated statewide revenues/allocations and funds available for right-of-way and construction. Lastly, Iowa DOT provides forecasted non-federal-aid revenues as well as operations and maintenance data for the federal-aid system. See the following section for more detail on the Iowa DOT's programming process regarding expenditures and funding.

The Ames City Council has programmed city sponsored projects in the City of Ames 2022-2027 Capital Improvements Plan (CIP) for the local funding allocation. These funds are generated from the City of Ames annual Road Use Tax Fund (RUTF) distribution, Local Option Sales Tax, and General Obligation (GO) bonds.

The transit program does not have targets; therefore, the requests involve significant costs in the anticipation of maximizing the amounts received either through formula or discretionary funding.

6.2 Iowa DOT O&M Estimated Expenditures and Funding

Each year prior to development of the Iowa DOT's Five-Year Program and the Statewide Transportation Improvement Program both state and federal revenue forecasts are completed to estimate the amount of funding available for programming. These forecasts are a critical component in the development of the Five-Year Program and as such are reviewed with the Iowa Transportation Commission. The primary sources of state funding to the DOT are the Primary Road Fund and TIME-21 Fund. These state funds are used for the operation, maintenance, and construction of the Primary Road System. The amount of funding available for operations and maintenance is determined by legislative appropriations. Additional funding is set aside for statewide activities including engineering costs. The remaining funding is available for right of way and construction activities associated with the highway program.

Along with state funds, the highway program utilizes a portion of the federal funds that are allocated to the state. A federal funding forecast is prepared each year based on the latest apportionment information available. This forecast includes the various federal programs and identifies which funds are allocated to the Iowa DOT for programming and which funds are directed to locals through the MPO/RPA planning process, bridge programs, and other various grant programs.

The following webpage provides additional insight into the DOT’s programming process and can be found at https://iowadot.gov/program_management/Five-Year-Program.

6.3 Fiscal Tables

The following describes each of the six fiscal tables presented in this document:

Table 7: **Table 7** summarizes the total project costs and associated federal-aid amounts by funding program.

Table 8 & Table 9: These tables demonstrate fiscal constraint for their respective funding programs. **Table 8** summarizes the STBG program while **Table 9** summarizes the TAP program. This incorporates the programmed project costs from **Table 7** as well as the funding targets provided by the Iowa DOT.

Table 10 & Table 11: These tables summarize projections based on 2021 operations and maintenance data provided by the Iowa DOT. This includes forecasted operations and maintenance data on the federal-aid system (**Table 10**) and forecasted non-federal-aid revenues (**Table 11**). The base year for the data was 2021. The shown projections utilize an assumed annual inflation rate of 4 percent.

Table 12: **Table 12** shows the Iowa DOT’s Five-Year Program funding amounts including statewide revenues, allocations, and funds available for right-of-way and construction.

8.3 FFY 2023 Transit Project Justifications

General Operations (5307/STA)

This funding supports the day-to-day transit operations of the Ames Transit Authority from Ames' urbanized area formula apportionment, Small Transit Intensive Cities (STIC), and State Transit Assistance (STA) funding.

Contracted Paratransit (Dial-A-Ride) Service (5310)

According to federal regulations, public transit agencies providing fixed-route transit service in their community must also provide door-to-door transportation service within a $\frac{3}{4}$ mile area of that fixed-route service. Therefore, CyRide purchases transportation service for its Dial-A-Ride operations in order to meet this ADA requirement. This requirement has been expanded to the entire city limits of Ames.

Infotainment LED signage (5310)

In the fall 2019, CyRide integrated automated vehicle annunciator (AVA) system synced with voice annunciators (audible announcements only) to help keep all passengers, disability or not, better informed of where the bus is located along the bus route(s). This system was in response to a request from Iowa State University's Alliance for Disability Awareness group which communicated their desire to have more bus stops announced throughout the Ames' community. Bus drivers must comply with the Americans with Disability Act (ADA) laws and manually announce major transit locations along transit routes along with any stops the public request. CyRide then added visual LED signage within each bus to deploy visual signage within each bus mirroring the LED audible stop announcements. The bigger infotainment LED signage allows more information to be displayed for this visual signage on CyRide's articulated buses while also allowing advertising on these vehicles. This project will be deployed in FY2023 and is over and beyond ADA requirements.

Annunciator Annual Service Fees (5310)

CyRide plans to utilize portions of its elderly & disabled funding towards its annual service fees for the automatic annunciator system to ensure compliance with its ADA announcement requirements. This is a non-traditional project but will allow compliance with the ADA law and improve awareness of where the bus is within the community for passenger's knowledge.

Heavy Duty Forty-Foot Bus Replacement (5339)

Twenty-three large forty-foot buses have exceeded FTA guidelines for useful life. Buses are identified as: 09070, 09071, 09072, 09073, 09074, 09075, 09076, 09077, 00418, 00419, 00420, 00421, 00422, 00423, 00424, 00425, 00126, 00127, 00128, 00186, 00187, 00188, and 00189. These units, if ranked high enough within the state's PTMS process or funded within a discretionary grant, will be replaced with 40' heavy-duty low-floor buses. These replacement vehicles will all be ADA accessible.

Heavy Duty Articulated Bus Expansion (STBG, 5339)

Currently, CyRide has seven articulated buses within its bus fleet, with two more currently being procured, with a goal to attain a total of ten to operate on its #23 Orange route. One additional articulated bus will complete the goal of having ten articulated buses within CyRide's fleet for this bus route. Specifically, the #23 Orange route transit route carries the highest number of passengers of any route in the State of Iowa at nearly 1.8 million passengers. CyRide will add Surface Transportation Block Grant (STBG) funding to an already approved contract for a 40-foot bus awarded through a direct national discretionary federal award for an articulated (60-foot) bus expansion within the fleet. The forty-foot bus specifically identified to be replaced and upgraded to an articulated bus through a federal award is 00502. The Ames Area Metropolitan Planning Organization has approved funding at \$225,000 for FY2023 for this upgrade.

Heavy Duty Forty-Foot Battery Electric Bus Replacement (5339, 5307)

Ten large diesel forty-foot diesel buses have exceeded FTA guidelines for useful life and will be replaced with battery electric buses. Three will be requested with formula funding and the other seven with federal discretionary funding. Bus numbers are: 00949, 00950, 00951, 00501, 00503, 00504, 00429, 00430, 00431, and 00432. If funded, this will further CyRide's efforts throughout the Ames community making it even more sustainable. All battery electric buses will be ADA accessible.

Miscellaneous Equipment (5339)

To support additional battery electric bus purchases, CyRide plans on installing additional charging equipment and dispensers to adequately charge these vehicles throughout the facility.

Facility Construction (5339)

To support additional battery electric bus purchases within the fleet, CyRide plans on rehabilitating the facility with additional electrical wiring between the transformer and the charging equipment as necessary to charge these new vehicles. Concrete platforms will be necessary as well to help keep the chargers out of flood waters if the facility floods in the future.

Architectural and Engineering (5339)

To support a battery electric bus project, architectural and engineering design services will be needed in order to assemble bid documents for the facility construction of this project.

Project Management (5339)

To support a battery electric bus project, project management will be necessary from a nationally renowned consultant to help navigate through the project implementation and results benefits as well as learn more about the latest technology in electric buses available to CyRide.

Workforce Training (5339)

To support a battery electric bus project, workforce training will be necessary to train mechanics and drivers on how to drive and maintain the new electric technology. This project is required as part of future discretionary grant applications.

Shop Rehabilitation Improvements (PTIG)

Separation of CyRide's shop and shop offices areas is greatly needed to provide distinct office space for critical work functions while also reducing employees' exposure to diesel particulates and loud noises that require hearing protection. CyRide is requesting funding to rehabilitate its shop area totaling \$750,000 from the Iowa DOT under its public transit infrastructure grant (PTIG) program specifically for:

- 1) Removing existing half walls within the maintenance fabrication area and repair the floor as necessary,
- 2) Install new precast concrete floor panels to connect the east and west maintenance mezzanines allowing stair access to the east mezzanine area and creating additional storage space,
- 3) Construct a new wall on ground level and add two doors to isolate the repair bays from office/parts areas which will help control sound pollution and vapors between the two spaces,
- 4) Move the eye wash, mop sink, wash fountain and supplies closer to the shop repair bays to improve mechanic work flow and improve safety,
- 5) Switch the welding and fabrication areas with the current parts room to isolate airborne particulates thereby improving safety,
- 6) Rework the maintenance offices/cubicles for a more practical layout and create space for Maintenance Coordinator Supervisor to have private conversations and
- 7) Rework the fire alarm and suppression system to bring the reworked spaces up to code.

9 - Changing an Approved TIP

Often after development and subsequent adoption of the TIP, changes may need to be made to the list of programmed projects. Examples of changes might be adding or deleting projects, moving a project between years in the TIP, adjusting project cost, or changing the vehicle numbers of transit vehicles.

A major requirement of a project receiving Federal transportation funds is for the project to be included in the TIP and Statewide Transportation Improvement Program (STIP). Once a project has received Federal Authorization for construction it does not need to be included in the TIP. This is one of two major reasons for adding or deleting a project from the TIP. The other major reason for adding a project is the awarding of a grant for a project, which can happen throughout the year.

Changes to the TIP are classified as either **amendments** or **administrative modifications** and are subject to different AAMPO Transportation Policy Committee and public review procedures.

9.1 Amendments

Amendments are major changes that may involve the following:

Project Cost: Projects in which the recalculated project costs increase Federal aid by more than 30 percent or increase the Federal aid by more than \$2 million from the original amount.

Schedule Changes: Projects added or deleted from the TIP.

Funding Source: Projects receiving additional Federal funding sources.

Scope Changes: Changing the project termini, project alignment, the amount of through traffic lanes, type of work from an overlay to reconstruction, or a change to include widening of the roadway.

Amendments are presented to the Transportation Policy Committee and a public comment period is opened, which continues until the next policy committee meeting. The Transportation Policy Committee meets on an as needed basis, providing a 3–4-week public comment period for amendments. Public comments are shared with the Transportation Policy Committee and action is taken on the amendment.

9.2 Administrative Modifications

Administrative modifications are minor changes that may involve the following:

Project Cost: Projects in which the recalculated project costs do not increase Federal aid by more than 30 percent or does not increase the Federal aid by more than \$2 million from the original amount.

Schedule Changes: Changes in schedule for projects included in the first four years of the TIP.

Funding Source: Changing funding from one source to another.

Scope Changes: Any changes to the scope require an amendment and cannot be approved through an administrative modification.

Administrative modifications are processed internally and are shared with the Transportation Policy Committee, the public, and AAMPO stakeholders as information items.

Appendix A – Resolution of Adoption

<Insert Resolution Here>

Appendix B – Self-Certification of Planning Activities

AMES AREA METROPOLITAN PLANNING ORGANIZATION ANNUAL SELF-CERTIFICATION

In accordance with 23 CFR 450.334, the STATE DEPARTMENT OF TRANSPORTATION and the Ames Area Metropolitan Planning Organization for the Ames, Iowa urbanized area(s) hereby certify that the transportation planning process is addressing the major issues in the metropolitan planning area and is being conducted in accordance with all applicable requirements of:

- (1) 23 U.S.C. 134, 49 U.S.C. Section 5303, and 23 CFR Part 450;
- (2) In nonattainment and maintenance areas, Sections 174 and 176(c) and (d) of the Clean Air Act as amended (42 U.S.C. 7504, 7506(c) and (d) and 40 CFR 93);
- (3) Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d-1) and 49 CFR part 21;
- (4) 49 U.S.C. 5332, prohibiting discrimination on the basis of race, color, creed, national origin, sex or age in employment or business opportunity;
- (5) Section 1101(b) of the Safe, Accountable, Flexible, Efficient Transportation Equity Act: A Legacy for Users (Pub. L. 109-59) regarding the involvement of Disadvantaged Business Enterprises in FHWA and FTA funded planning;
- (6) 23 CFR part 230, regarding the implementation of an equal employment opportunity program on Federal and Federal-aid highway construction contracts;
- (7) The provisions of the Americans with Disabilities Act of 1990 (42 U.S.C. 12101 *et seq.*) and 49 CFR parts 27,37, and 38, and USDOT implementing regulation;
- (8) Older Americans Act, as amended (42 U.S.C. 6101);
- (9) 23 U.S.C. 324, regarding prohibition of discrimination based on gender; and
- (10) Section 504 of the Rehabilitation Act of 1973 and 49 CFR Part 27, regarding discrimination against individuals with disabilities.

For AAMPO:

John Haila, Chair
Transportation Policy Committee

3-22-22

Date

Appendix C – List of Federal and State Funding Programs

Federal Funding Sources

Projects identified in TIPs utilize, or are based upon, several different sources of federal funding. The primary sources of FHWA funding to Iowa, which are in part used to fund local efforts, include:

- **Congestion Mitigation and Air Quality Improvement Program (CMAQ).** CMAQ provides flexible funding for transportation projects and programs tasked with helping to meet the requirements of the Clean Air Act. These projects can include those that reduce congestion and improve air quality.
- **Demonstration funding (DEMO).** Demonstration funding is a combination of different programs and sources. The FHWA administers discretionary programs through various offices representing special funding categories. An appropriation bill provides money to a discretionary program, through special congressionally directed appropriations or through legislative acts, such as the American Recovery and Reinvestment Act of 2009 (ARRA).
- **Highway Safety Improvement Program (HSIP).** This is a core federal-aid program that funds projects with the goal of achieving a significant reduction in traffic fatalities and serious injuries on public roads. A portion of this funding is targeted for use on local high-risk rural roads and railway-highway crossings.
- **Metropolitan Planning Program (PL).** FHWA provides funding for this program to the State of Iowa based on urbanized area population. The funds are dedicated to support transportation planning efforts in urbanized areas with a population of 50,000 or greater. For programming purposes MPOs should program only the new PL target provided by the Systems Planning Bureau. Any carryover funds identified by Systems Planning need not be added to, or subtracted from, the PL target.
- **National Highway Performance Program (NHPP).** NHPP funds are available to be used on projects that improve the condition and performance of the National Highway System (NHS), including some state and U.S. highways and interstates.
- **State Planning and Research (SPR).** SPR funds are available to fund statewide planning and research activities. A portion of SPR funds are provided to RPAs to support transportation planning efforts.

- **Surface Transportation Block Grant Program (STBG).** This program is designed to address specific issues identified by Congress and provides flexible funding for projects to preserve or improve the condition/performance of transportation facilities, including any federal-aid highway or public road bridge. STBG funding may be utilized on:
 - Roadway projects on federal-aid routes
 - Bridge projects on any public road
 - Transit capital improvements
 - TAP eligible activities
 - Planning activities

Iowa targets STBG funding to each of its 27 MPOs and RPAs on an annual basis for programming based on regional priorities.

Iowa also targets a portion of its STBG funding directly to counties for use on county bridge projects. Iowa's Swap program swaps federal STBG funding for state Primary Road Fund dollars. These funds can be used on either on-system or off-system bridges however off-system bridge investments must be continued to maintain the ability to transfer the federal STBG set-aside for off system bridges.

- **Transportation Alternatives Set-Aside Program (TAP).** This program is a setaside from the STBG program. The TAP program provides funding to expand travel choices and improve the transportation experience. Transportation Alternatives Program projects improve the cultural, historic, aesthetic, and environmental aspects of transportation infrastructure. Projects can include creation of bicycle and pedestrian facilities, and the restoration of historic transportation facilities, among others. It is important to note that some types of projects eligible under the SAFETEA-LU program Transportation Enhancements are no longer eligible, or have modified eligibility, under the TAP. All projects programmed with TAP funds should be verified to ensure compatibility with TAP eligibility.
- **Federal Lands Access Program (FLAP) and Tribal Transportation Program (TTP).** The FLAP Program provides funding for projects that improve access within, and to, federal lands. The FLAP funding will be distributed through a grant process where a group of FHWA, Iowa DOT, and local government representatives will solicit, rank, and select projects to receive funding. The TTP provides safe and adequate transportation and public road access to and within Indian reservations and Indian lands. Funds are distributed based on a statutory formula based on tribal population, road mileage, and average tribal shares of the former Tribal Transportation Allocation Methodology.

- **National Highway Freight Program (NHFP).** NHFP funds are distributed to states via a formula process and are targeted towards transportation projects that benefit freight movements. Ten percent of NHFP funds will be targeted towards non-DOT sponsored projects.

Iowa DOT-Administered Grant Program Funding Sources

In addition to the federal funding sources listed above, the Iowa DOT administers several grant programs that are funded, in part, with the federal sources identified above. Projects awarded grant funding must be documented in the region's TIP. These grant awards are distributed through an application process. State administered grant programs include:

- **City Bridge Program.** A portion of STBG funding dedicated to local bridge projects is set aside for the funding of bridge projects within cities. STBG funding is swapped for state Primary Road Fund dollars. Eligible projects need to be classified as structurally deficient or functionally obsolete. Projects are rated and prioritized by the Local Systems Bureau with awards based upon criteria identified in the application process. Projects awarded grant funding are subject to a federal-aid obligation limitation of \$1 million.
- **Highway Safety Improvement Program – Secondary (HSIP-Secondary).** This program is funded using a portion of Iowa's Highway Safety Improvement Program apportionment and funds safety projects on rural roadways. Federal HSIP funding targeted towards these local projects is swapped for Primary Road Fund dollars.
- **Iowa Clean Air Attainment Program (ICAAP).** The ICAAP funds projects that are intended to maximize emission reductions through traffic flow improvements, reduced vehicle-miles of travel, and reduced single-occupancy vehicle trips. This program utilizes \$4 million of Iowa's CMAQ apportionment.
- **Recreational Trails Program.** This program provides federal funding for both motorized and nonmotorized trail projects and is funded through a takedown from Iowa's TAP funding. The decision to participate in this program is made annually by the Iowa Transportation Commission.
- **Iowa's Transportation Alternatives Program (TAP).** This program targets STBG funding to MPOs and RPAs to award to locally sponsored projects that expand travel choices and improve the motorized and non-motorized transportation experience.

Federal and State Transit Funding Programs

Like the FHWA programs listed above, the transit funding authorized by the FAST-Act is managed in several ways. The largest amount is distributed, by formula, to states and large metropolitan areas. Other program funds are discretionary, and some are earmarked for specific projects. Program funds include:

- **Metropolitan Transportation Planning program (Section 5303 and 5305).** FTA provides funding for this program to the state based on its urbanized area populations. The funds are dedicated to support transportation planning projects in urbanized areas with more than 50,000 persons.
- **Statewide Transportation Planning program (Section 5304 and 5305).** These funds come to the state based on population and are used to support transportation planning projects in nonurbanized areas. They are combined with the Section 5311 funds and allocated among Iowa's RPAs.
- **Urbanized Area Formula Grants program (Section 5307).** FTA provides transit operating, planning and capital assistance funds directly to local recipients in urbanized areas with populations between 50,000 and 200,000. The funding is suballocated from the State for transit agencies serving a population of this size. Assistance amounts are based on population and density figures and transit performance factors for larger areas. Local recipients must apply directly to the FTA.
- **Bus and Bus Facilities Program (Section 5339).** This formula program provides federal assistance for major capital needs, such as fleet replacement and construction of transit facilities. All transit systems in the state are eligible for this program.
- **Enhanced Mobility of Seniors and Individuals with Disabilities Program (Section 5310).** Funding is provided through this program to increase mobility for the elderly and persons with disabilities. Part of the funding is administered along with the nonurbanized funding with the remaining funds allocated among urbanized transit systems in areas with a population of less than 200,000. Urbanized areas with more than 200,000 in population receive a direct allocation.
- **Nonurbanized Area Formula Assistance Program (Section 5311).** This program provides capital and operating assistance for rural and small urban transit systems serving under 50,000 in population (*not available for Ames*). Fifteen percent of these funds are allocated to intercity bus projects. A portion of the funding is also allocated to support rural transit planning. The

remaining funds are combined with the rural portion (30 percent) of Section 5310 funds and allocated among regional and small urban transit systems based on their relative performance in the prior year.

- **Rural Transit Assistance Program (RTAP) (Section 5311(b)(3)).** This funding is used for statewide training events and to support transit funding fellowships for regional and small urban transit staff or planners. *(Not available for Ames)*
- **Flexible funds.** Certain Title 23 funds may be used for transit purposes. Transit capital assistance is an eligible use of STBG funds. Transit capital and startup operating assistance is an eligible use of ICAAP funds. When ICAAP and STBG funds are programmed for transit projects, funding is transferred from FHWA to the FTA for dispersing either directly to the transit system or to the Iowa DOT. The Ames MPO distributes its own STBG funding throughout the Ames metropolitan area. The ICAAP funds are applied for and administered by the Iowa DOT's Public Transit Bureau. STBG funds for small urban and regional transit systems are also administered the Public Transit Bureau.
- **State Transit Assistance (STA).** All public transit systems are eligible for State funding. These funds can be used by the public transit system for operating, capital, or planning expenses related to the provision of open-to-the-public passenger transportation. The majority of the funds received in a fiscal year are distributed to individual transit systems on the basis of a formula using performance statistics from the most recent available year.
 - **STA Special Projects.** Each year up to \$300,000 of the total STA funds are set aside to fund "special projects." These can include grants to individual systems to support transit services that are developed in conjunction with human services agencies. Grants can also be awarded to statewide projects that improve public transit in Iowa through such means as technical training for transit system or planning agency personnel, statewide marketing campaigns, etc. This funding is also used to mirror the RTAP to support individual transit training fellowships for large urban transit staff or planners.
 - **STA Coordination Special Projects.** Funds provide assistance with startup of new services that have been identified as needs by health, employment, or human services agencies participating in the passenger transportation planning process.

- **Public Transit Infrastructure Grant Fund.** This is a state program that can fund transit facility projects that involve new construction, reconstruction, or remodeling. To qualify, projects must include a vertical component.

Appendix D – STBG & TAP Application Forms

AMES AREA METROPOLITAN PLANNING ORGANIZATION SURFACE TRANSPORTATION BLOCK GRANT PROGRAM (STBG) APPLICATION

General Information

MPO: Ames Area MPO e-mail: _____

Sponsor/Applicant Agency: _____

Contact Person (Name & Title): _____

Complete Mailing Address: _____
Street Address and/or Box No.

City _____ State _____ Zip _____ Daytime Phone _____

If more than one agency or organization is involved in this project, please state the name, contact person, mailing address, and telephone number of the second agency. *(Attach an additional page if more than two agencies are involved.)*

Applicant Agency: _____ e-mail: _____

Contact Person (Name & Title): _____

Complete Mailing Address: _____
Street Address and/or Box No.

City _____ State _____ Zip _____ Daytime Phone _____

Project Information

Project Title: _____

Project Description (including length if applicable) required: _____

Project in Long Range Transportation Plan?: Yes No If Yes, LRTP ID: _____

If this project includes land acquisition, how many acres? _____

Project Category Check all boxes that apply to indicate the categories that best describe your project.

Construction	Start Date	_____	Completion Date	_____
Noninfrastructure	Start Date	_____	Completion Date	_____

Has any part of this project been started? Yes No

If yes, explain: _____

Documentation and Narrative Information

The following documents and narratives must be attached to this application. In the upper right-hand corner of each document or narrative write the corresponding letter shown below.

- A. A NARRATIVE assessing existing conditions, outlining the concept of the proposed project, and providing adequate project justification. Surface Transportation Program projects must have a direct relationship to the intermodal transportation system, either as it exists or as it is planned. Assess your project in regard to the transportation system relative to its functional relationship, proximity, or impact to an existing or planned transportation facility. Assess the value of this project from a regional perspective and how it will be a functional addition to the transportation system and the region as a whole if no additional development funds are received.
- B. A DETAILED MAP identifying the location of the project.
- C. A SKETCH-PLAN of the project, including cross sections of roadways.
- G. A NARRATIVE discussing the public input process that was followed and the extent to which adjacent property owners and others have been informed of the proposed project and an assessment of their acceptance.

The award of STBG funds; any subsequent funding or letting of contracts for design, construction, reconstruction, improvement, or maintenance; or the furnishing of materials shall not involve direct or indirect interest, prohibited by Iowa Code Sections 314.2, 362.5, or 331.342, of any state, county, or city official, elective or appointive. Any award of funding or any letting of a contract in violation of the foregoing provisions shall invalidate the award of funding and authorize a complete recovery of any funds previously disbursed.

Certification

To the best of my knowledge and belief, all information included in this application is true and accurate, including the commitment of all physical and financial resources. This application has been duly authorized by the participating local authority. I understand that, although this information is sufficient to secure a commitment of funds, an executed contract between the applicant and the Iowa Department of Transportation is required prior to the authorization of funds.

Representing the _____

Signature Date

Typed Name and Title Date

Please send one copy of the application with the supportive documentation to:

Ames Area Metropolitan Planning Organization
515 Clark Avenue
Ames, Iowa 50010

ATTACHMENT A

Itemized breakdown of total project costs guidelines.

Construction Costs – these may be based on historical averages for entire projects of similar size and scope. Examples include:

- Typical cost / mile of trail (i.e. \$200,000 per mile for moderate terrain and limited number of structures)
- Typical cost / square foot of bridge deck
- Typical cost / traffic signal upgrade (i.e. \$163,000 per lump sum signal bid item)
- Typical cost / lineal foot of sidewalk

Design / Inspection Costs – these may be estimated based on the following typical percentages of construction costs:

- 8-10% for preliminary up through final design and letting activities
- 12-15% for construction inspection activities

Right-of-way Acquisition Costs – these may be estimated based on the following:

- Impact and description of impact
- Typical cost / square foot for permanent right-of-way
- Typical cost / square foot for temporary easements

Utility and Railroad Costs – these may be estimated based on the following:

- Impact and description of impact
- Typical cost / linear foot of relocated or reconstructed facility (track, pipe, electrical lines, etc.)
- Typical cost / installation (RR switches, utility poles, transformers, control boxes, etc.)

Indirect Costs – if indirect costs are involved, e.g., wages:

- Estimated hours
- Estimated hourly rate, salary
- Estimated fringe, direct
- Other direct cost estimate
- Other indirect cost estimate

The Ames Area MPO utilizes Iowa DOT Form 240004 for its regional TAP applications. This form can be found at the following link:
