**To:** City Council and Mayor; Pregitzer, Damion  
**Cc:** d\_p\_weber@hotmail.com  
**Subject:** Petition: Quarry Estates 4-Way Stop Sign  
**Attachments:** Quarry Estates 4 Way Stop Intersection.pdf

[External Email]

Hello Mayor, Council and Traffic Engineer,

Please see the attached PDF for a petition to create a 4-way stop in the Quarry Estates subdivision in Ames.

If you have any questions, please contact either myself or Dan Weber. Contact details are included in the attached PDF.

In addition to the attached PDF, I will be dropping off a paper copy of the PDF for each City Council member and the traffic engineer at City Hall.

Sincerely,  
Jamie Shore

# Petition

TO: City of Ames Mayor, City Council and Traffic Engineer  
FROM: Residents of Quarry Estates Subdivision and Vintage Cooperative Senior Living Community  
DATE: 18 June 2024  
SUBJECT: 4-Way Stop Sign at Ada Hayden Road and McFarland Ave

We request that the City of Ames make the intersection of Ada Hayden Rd and McFarland Ave a four-way stop intersection in the interest of **pedestrian safety**. We have collected **78 signatures** from the subdivision of Quarry Estates and the Vintage Cooperative Senior Living facility in support of this petition.

Currently, only McFarland Rd has stop signs. Two additional stop signs need to be installed on Ada Hayden Rd. Ada Hayden Rd is accessed from both Hyde Ave and W. 190th street. The straight stretch of Ada Hayden Rd is more than a half mile long which results in many drivers passing through the intersection traveling above the posted speed limit. Some of the drivers are distracted on their phones. Creating a four-way stop intersection will slow the vehicle traffic passing through the intersection.

This intersection is used by many pedestrians on a daily basis. In particular:

- The immediate area around the intersection has at least two dozen young children that cross this intersection on foot, bicycles, scooters as well as parents pushing their infants in strollers.
- Young elementary and middle school students use a school bus stop that is 150 feet from the intersection. We have signatures from the parents near the intersection, whose kids are picked up and dropped off near the intersection.
- Pedestrians enter and exit Ada Hayden park at an access point that is 150 feet from the intersection.
- Many pedestrians from the Vintage Cooperative Senior Living Community pass through this intersection as they walk for exercise in Quarry Estates. We have collected 9 signatures from residents of the Coop that support this petition.
- 19 signatures from Quarry Dr (in Quarry Estates) were collected in support of the petition. These residents are more than a quarter of a mile away from the intersection.
- The western section of Quarry Estates on Ada Hayden Rd and Ketelsen Dr is not completely built out. When all of the houses are finished, the intersection will be busier with cars and pedestrians.

Our package of documents to the City includes:

- This introduction letter
- Emails from previous requests
- Map showing where the signatures were collected
- 13 pages of signatures with a total of 78 signatures

Subject: Re: Dangerous intersection--Quarry Estates

1st Request  
Did Not Comply

Damion:

As a homeowner on the corner of Ada Hayden and McFarland drive, I also have concerns about the speed of traffic on Ada Hayden Drive. I have witnessed many time seeing young children near the street intersection as cars fly with no knowledge of them being there (some being on their smart devices as the drive). I also have concerns backing out of my driveway and being hit by a speeding car. As cars come down the street it's though drivers think it is a highway and increase speeds upwards of 40-50 mph. It is an accident waiting to happen. Being in the middle of the street, stop signs stopping cars on Ada Hayden Drive would slow traffic going both ways and improve pedestrian and drivers safety in the whole neighborhood.

Thanks for your consideration!

Dan Weber

Subject: Stop Signs Needed

2nd Request  
Did Not Respond

Hello Mr Pregitzer,

Two additional stop signs are desperately needed on Ada Hayden Rd at the intersection with McFarland Ave. Cars moving east and west on Ada Hayden Rd need a traffic calming solution to reduce the risk of hitting pedestrians, mainly young kids that are crossing the intersection. This straight section of Ada Hayden Rd is more than 0.5 mile long which gives cars an ample opportunity to drive too fast through this intersection. As a resident living 3 houses away, I routinely see cars traveling way too fast on Ada Hayden through this intersection. A four way stop intersection will force cars to slow down and watch for pedestrians.

Currently and ironically, there are two stop signs on McFarland where cars have less of a chance to build speed. I find this logic to be backwards and lacking effectiveness. The current arrangement of having two stop signs on McFarland Ave (and NO stop signs on Ada Hayden) places an emphasis on protecting the speeding cars on Ada Hayden. This approach reduces the safety of pedestrians and encourages higher car speeds on Ada Hayden. This intersection needs to be a four way stop intersection. Anything less increases the chances of injuries to pedestrians.

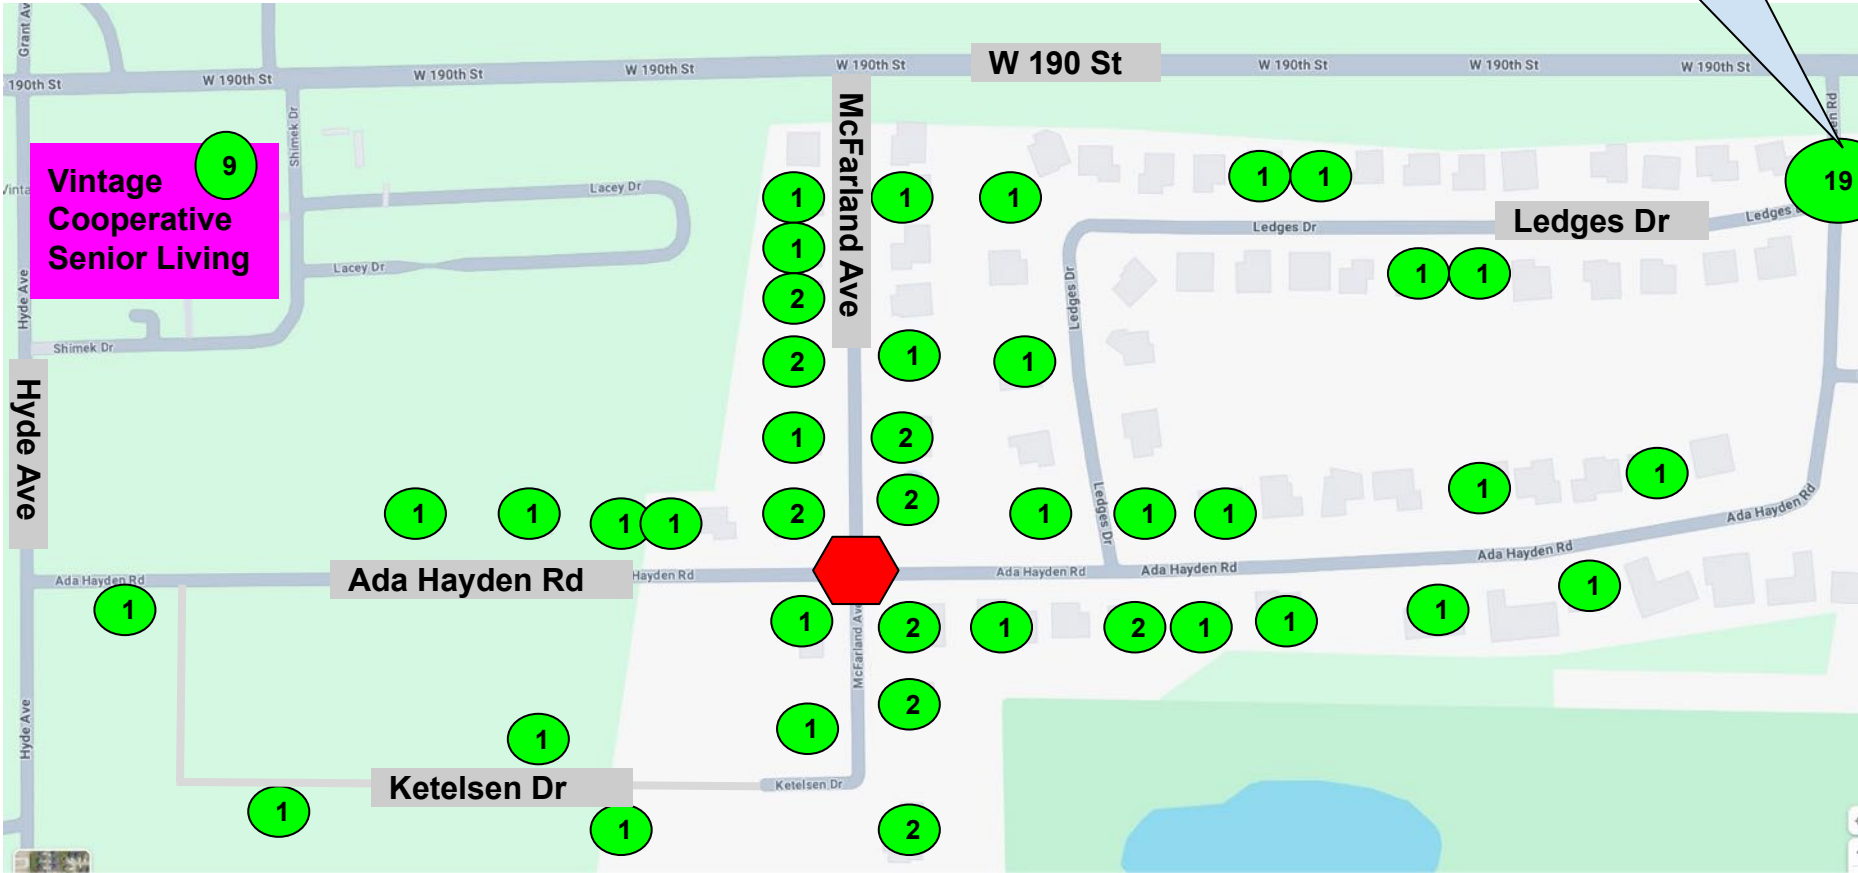

Sincerely,  
Jamie and Suzanne Shore  
5807 McFarland Ave
